FL License Number	PY8307
Supervisor Email	ktom@nova.edu
Supervisor Phone	3059260035

CCE Case Available? No
Description of the Practicum The practicum at the Clinic for Research and Treatment (CRT) is an innovative center that provides training, development, and therapeutic initiatives designed to enhance the quality of life for service members by equipping them with essential life and self-regulation skills. Our principal program is a pioneering approach to treatment in collaboration with The Veterans Trust by blending elements of stress inoculation treatment, simulated racing with psychological skills training to help participants improve their mental and physical health, often related to trauma. Currently, we provide a host of services for veterans, active duty, and first responders, which include: • Psychological Skills Training • Continuing education for first responders • Biofeedback and Neurofeedback • Stress Inoculation Training • Simulation-based training • Sleep Therapy (Potential for CCE) We are actively working on developing additional treatment (which would allow for a CCE case) and therapeutic approaches, including: • STAIR Narrative Therapy • Ketamine Therapy with wrap-around psychoeducational treatment • Diet and Nutrition Students who work within the practicum will get experience with assessment, biofeedback and neurofeedback, research, and therapy. We also conduct forensic evaluations for Childnet and Immigration Attorneys.
Primary Client/Patient Populations Served • Individuals • Groups • Outpatient • Adults (19-64) • Older Adults (65+) • Military Active Duty / Veterans • Other First Responders
Primary Treatment Modalities • Mindfulness • Other Ketamine. Biofeedback and Neurofeedback. Stress Inoculation. Psychological Skills Training. Simulation-based Training.
Primary Assessment Types • Neuropsychological • Objective Personality • Projective Personality
Trainee Requirements • Background Check Level 2 • Other: Some evening hours, and possibly some weekend days.

Supervisor Phone	9542625731

CCE Case Available? Yes	
Description of the Practicum	
The Adult Services Program provides psychotherapy services to an adult population with an integrative therapeutic approach. Trainees will receive supervised clinical interviewing experience(comprehensive biopsychosocial interviews), assigned a caseload of 4-5 clients to be seen for individual psychotherapy, have opportunity to participate in group therapy(process and dbt group), mandatory attendance to biweekly case conference, small group supervision with intern/post doc, weekly supervision with licensed psychologist. A PSC Orientation is scheduled in mid August prior to the academic year beginning.	
Primary Client/Patient Populations Served	
• Individuals • Groups • Outpatient • Adults (19-64) • Older Adults (65+) • College Students • Military Active Duty / Veterans • LGBTQ+	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Psychodynamic Therapy • Dialectical Behavior Therapy	
Primary Assessment Types	
• Intelligence • Objective Personality • Projective Personality	
Trainee Requirements	
• Spanish speaking preferred • Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test	
Couse work in clinical interviewing, helpful to have some previous direct clinical experience but not necessary. Familiarity with medication families and familiarity with psychological testing helpful but not necessary.	

a. First Year

Program/Site Name	NSU PSC Anxiety Treatment Center (ATC)
Address	3301 College Ave
Supervisor Name	Dr. Kayla Thayer, Ph.D., ABPP
FL License Number	PY10292
Supervisor Email	kthayer@nova.edu
Supervisor Phone	954-262-5880

CCE Case Available? Yes
Description of the Practicum ATC provides state of the art diagnosis, assessment, and treatment for adults with anxiety and other comorbid psychiatric and/or medical conditions. ATC specializes in the treatment of panic, social anxiety, GAD, specific phobias, and OCD. Students may also treat comorbid depressive, personality, trauma/PTSD, sleep, and alcohol/substance use disorders. Students will be trained in the most current manualized, evidence-based treatments which provide a nice structure for new clinicians. Students have the opportunity to learn CBT, ERP, ACT, DBT, PE and CPT. Students will also be trained in several evidence-based diagnostic/assessment measures (SCID, ADIS, WAIS, MoCA, etc.). Students will learn how to administer, score, interpret measures, and write integrated reports. Students will learn effective documentation/writing, treatment planning, and develop strong clinical skills. Training is intended to prepare students for successful CCE defense and internship placement. Opportunities may also exist to participate in research projects.
Primary Client/Patient Populations Served - Individuals - Adults (19-64) - Older Adults (65+) - College Students - Military Active Duty / Veterans - LGBTQ+
Primary Treatment Modalities - Behavioral/Cognitive Behavioral Therapy - Acceptance and Commitment Therapy - Exposure Therapy - Mindfulness - Dialectical Behavior Therapy - Other Trauma-focused therapy (PE, CPT); Motivational Interviewing
Primary Assessment Types - Achievement and Aptitude - Intelligence - Other Semi-structured clinical interviews; self-report measures
Trainee Requirements

- Background Check Level 2
- Medical Marijuana Use prohibited (i.e., not allowed)
- Drug Test

PSC orientation days in August; ATC on-boarding days in August. Students are also provided with mandatory reading and training materials to complete over summer. PSY4669 (Summer Anxiety Elective course with Dr. Thayer prior to Fall start). Supervision requirements include 90 minutes Individual supervision with Dr. Thayer weekly; 1 hour case conference weekly. Specific evening hours are None required; may depend on client availability. Direct clinical contact includes 4 hours/week for 2nd year students; 6 hours/week for 3rd year students.

CCE Case Available? Yes

Description of the Practicum

CATSP OVERVIEW CATSP serves children and families who have experienced a variety of types of trauma, bereavement, bereavement, and other losses. We also provide diagnostic and clinical assessment for traumatic stress and bereavement-related disorders, including posttraumatic stress disorder (PTSD) and prolonged grief disorder. CATSP students will be engaging in evidence-based assessment and treatment of children and adolescents and their families who have experienced various adverse childhood events, with a specific emphasis on traumatic stress/PTSD and bereavement/loss/grief. CATSP HOUR REQUIREMENTS: DIRECT CLINICAL CONTACT -CATSP students will be engaging in evidence-based assessment and treatment of children and adolescents and their families who have experienced various adverse childhood events, with a specific emphasis on traumatic stress/PTSD and bereavement/loss/grief. -A first-year practicum student will complete at least 10-15 weekly hours associated with the practicum. Of these, a minimum of 4-6 hours weekly will be devoted to direct client contact hours. -CATSP students will be engaging in evidence-based assessment and treatment of children and adolescents and their families who have experienced various adverse childhood events, with a specific emphasis on traumatic stress/PTSD and bereavement/loss/grief. -A first-year practicum student will complete at least 10-15 weekly hours associated with the practicum. Of these, a minimum of 4-6 hours weekly will be devoted to direct client contact hours. -a second-year practicum student will complete a minimum of fifteen (15) hours per week. Of the total hours, 40% (a minimum of 6 hours) are expected to be devoted to clinical contact (assessment, intervention, or consultation). CATSP ATTENDANCE REQUIREMENTS -Participate in All-CATSP Didactic Training sessions (supervisors/all CATSP students) for 2 hours/month (format to be decided based on schedules). -Weekly small group (2-5 students) supervision with either Dr. Layne or Dr. Loeb: 2-3 hrs./week (day/time set by supervisor/small group members) -Weekly CATSP Coordinator/practicum student individual meetings: 1 hr./week. CATSP CURRICULUM: Content covered in All-CATSP Didactic Training sessions will include training in: -Emergency Response Packet (protocol and supplementary materials) - Conducting Formal Risk Assessments Mandated Reporting Laws -Child-on-Child Reporting Laws - Columbia Suicide Severity Rating Scale (C-SSRS) Training and Practice -Other Relevant Topics (as determined by the CATSP Leadership Team, comprised of both CATSP clinical supervisors and the CATSP Coordinators) -Clinical competency examination (CCE) presentations by more experienced students - Guest speakers (presenters/topics to be announced) -Formal Online Training -Required Reading Materials -Presentations in CATSP meetings (led by CATSP Coordinators) -First-year CATSP practicum students are strongly encouraged to enroll in Dr. Layne's section of Case Conceptualization in Winter Semester given that he covers a broad range of core competencies that are integral to (but not specific to) trauma-informed practice. Many of these competencies help trainees prepare for their CCE case and for internship interviews. INTERVENTION TRAINING OBJECTIVES -CATSP practicum trainees will be able to select and implement various evidence-based assessment measures and manualized interventions based on a variety of client factors. These factors include presenting problems, diagnostic/assessment profile, prior history, developmental level, mental abilities, diversity considerations, family structure, logistical considerations, and client motivation and informed preferences. INTERVENTION TRAINING METHODS CATSP trainees will

be exposed to many of the below interventions, depending on each trainee's case load and interests: Learn and implement TGCTA (Trauma and Grief Component Therapy for Adolescents) and/or MGT (Multidimensional Grief Therapy) Other potential interventions to learn and implement include: ERP DBT ACT Coping CAT Defiant Child/Defiant Teen -Trainees can also explore and evaluate other relevant interventions depending on the specific needs of CATSP clients/populations -Trainees are expected to consult/confer with Drs. Loeb or Layne on the basis of their respective areas of professional experience and expertise.

ASSESSMENT TRAINING OBJECTIVES -CATSP clinicians will be able to conduct a comprehensive evidence-based biopsychosocial (BPS) evaluation and record the resulting findings in a professional-quality written report in APA format. Writing guides for this work include: -The most recent edition of the APA Style Manual (for writing in APA style) -Strunk and White (currently 4th edition) (for writing clear and concise prose). -An extensive BPS Model Assessment Report has been developed by the CATSP Leadership Team over several years. This Model includes examples of written text and extensive call-out comment boxes compiled from years of prior edited BPS reports. CATSP practicum trainees are required to read through the entire Model Report, including all comments, as part of preparing to write their first report. The Model Report should also be used liberally as a reference while writing all trainee BPS reports.

ASSESSMENT TRAINING METHODS -CATSP students will complete at least four comprehensive biopsychosocial evaluations using an assessment battery consisting of carefully- and individually-chosen measures. -These measures will varyingly be used in such assessment applications as risk screening, baseline/clinical assessment, diagnosis and differential diagnosis, case conceptualization, treatment planning, ongoing surveillance and progress monitoring, and assessment of post-treatment outcomes.

SUPERVISION OBJECTIVES -Practice presenting clinical cases in clear, accurate, efficient, comprehensive, logical, and clinically actionable ways. -Gain guidance and support in refining case conceptualization, enhancing understanding of client issues, and treatment planning. -Offer constructive feedback to peers on their cases, fostering a collaborative and supportive learning environment. -Engage in collaborative problem-solving with the supervision group to address and manage complex case scenarios. -Enhance understanding of diverse therapeutic approaches and their application through group discussion and shared experiences. -Improve ability to integrate theoretical knowledge with practical application in real-world clinical settings. -Practice making professional decisions (e.g., thinking through ethical dilemmas, identifying stakeholders, selecting measures and interventions, and considering whether to terminate) using the best available evidence. -Build professional competency and confidence in clinical decision-making and professional self-care through reflective supervision practices.

SUPERVISION METHODS CATSP students will: -attend group, individual, and peer-to-peer supervision. -practice presenting case facts, including presenting problems, assessment results, and other sources of information (e.g., school records). -present their case conceptualization of their clients and treatment plans. -provide constructive feedback and suggestions to one other on their cases (e.g., measures for assessment batteries, manualized interventions, theoretical orientations, treatment protocols/manualized interventions, treatment goals, intervention skills, methods for adapting or tailoring interventions) -deliberate with one another and supervisors to brainstorm ideas for difficult case presentations, ethical dilemmas, and other problems. -present and discuss how the undergirding theory (upon which the intervention is based) guides treatment. This includes the selection of treatment goals, session objectives, and practice elements/therapeutic skills used. -critically reason through and share their treatment decisions (e.g., assessment measure selection, diagnosis/differential diagnosis, case conceptualization, treatment planning/goals, methods for engaging clients, etc.). -Come prepared to present (in large or small group supervision), discuss, and deliberate over ethical dilemmas, including quoting and citing appropriate references (e.g., APA Code of Ethics, Florida Statutes, etc.) to serve as guidelines to deliberations. -receive feedback from peers and supervisors in respectful and supportive ways so as to foster a collaborative and supportive environment.

Primary Client/Patient Populations Served

• Individuals • Children (under 13) • Adolescents (13-18) • Family • LGBTQ+ • Other Bereaved children, adolescents, and their families
Primary Treatment Modalities
• Behavioral/Cognitive Behavioral Therapy • Exposure Therapy • Dialectical Behavior Therapy • Other Family therapy, Trauma Therapy (Drs. Layne & Loeb), Grief Therapy (Dr. Layne), OCD (Dr. Loeb)
Primary Assessment Types
• Other Diagnostic assessment (especially trauma/adjustment disorder/PTSD; bereavement/grief; depression, anxiety, family functioning); psychosocial functioning; we occasionally include intelligence testing if relevant to diagnosis/assessment of school functioning
Trainee Requirements
• Spanish speaking preferred • Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test
MARRIAGE REQUESTS Regarding marriage requests: Given the complex and difficult cases we see, we give preference in offering CATSP marriages to (a) second-year practicum students, and (b) first-year practicum students with prior trauma experience (master's degree, prior experience/training in trauma and/or bereavement/loss) given that we refer our most complex cases to these trainees. Nevertheless, reliable, psychologically hardy first-year practicum students who lack a master's degree but are good with children are also welcome to interview. Live sessions yes; Telehealth sessions optional for Dr. Layne's supervisees. This is a rigorous practicum focusing on teaching a broad range of competencies integral to Trauma Psychology, often while working with complex, often low-income/underserved/high risk youth and families.

Supervisor Name	Ashley M. Stripling, PhD
FL License Number	PY9031
Supervisor Email	astripling@nova.edu
Supervisor Phone	954-262-5762

CCE Case Available? Yes

Description of the Practicum

The Nova Southeastern University (NSU) Counseling Center for Older Adults treats adults ages 55 years or older who are interested in developing more effective ways of managing the difficult situations and challenges that can occur in life. The overarching goal of the program is to help our clients age as well as possible, which includes maximizing their quality of life and level of functioning. Common presenting issues include adjustment, anxiety, bereavement, depression, disease management strategies, caregiver burden, loneliness, relationship problems, and stress. Practicum trainees are assigned a diverse client caseload of between 1-5 clients and work in a variety of modalities (e.g., individual, marital, family, and group therapy.). Cases are representative of diverse socioeconomic backgrounds, ethnic/racial and gender identities, sexual orientations, religions, disabilities, and presenting problems. Students will complete at minimum of two (2) biopsychosocial (BPS) evaluations during the year to provide a means of refining diagnostic and treatment planning skills (6 assessment hours per BPS: 9-12 hours total). In addition to therapeutic and assessment services, this program provides consultative and collaborative services with the NSU Health Professions Division (HPD) and the south Florida community. Students will complete at least one (1) consultation project over the course of the year to a community partner. In addition to 1.5 hours of weekly individual supervision with Dr. Stripling there is mandatory 1-hour Case Conference with the Intern, and in-service trainings throughout year (see below). Optional specific evening hours are possible. Outside of standing supervision and training times, all other commitments are subject to student and client agreement.

Primary Client/Patient Populations Served

- Individuals

Behavioral/Cognitive, Screeners

Trainee Requirements

- Spanish speaking preferred
- Background Check Level 2
- Drug Test

Basic understanding of various theories and empirically supported therapeutic treatment approaches for late life(e.g., mCBT, IPT, ACT, life review, PCTI, existential) are encouraged. Familiarity with health & aging psychology is also important. NCCOA specific training takes place prior to start or during first week of practicum, usually during the days and time when supervision would be provided. Also, all students are required to complete a reading list prior to practicum start. Dr. Stripling's summer A course, Clinical Geropsychology and/or Counseling in Terminal care is strongly recommended. The following didactics are offered yearly: • PSC Orientation (required) • NCCOA Orientation (required) • Telehealth Training (required) • NCCOA Cognitive/Affective training (required) • NCCOA Cognitive/Affective assessment administration, scoring, and interpretation check outs (required) • NCCOA Reading List (required) • GWEP Interdisciplinary Geriatric Journal Club (optional) • JFNA/NCCOA didactics on Age-related topics (required)

Description of the Practicum

The Family Violence Program serves adult victims and batterers involved in abusive relationships. Services include individual therapy for victims of abuse and/ or other forms of trauma as well as for those who struggle with anger management. Training is in cognitive-behavioral, family systems, experiential, and social-learning. Additionally, the Family Violence Program runs a 16-week Social-Skills Group for adolescents on the Autism Spectrum, engaging them in social learning activities to help them improve their communication and relationship-building and maintenance skills.

Description of the Practicum

Nova Southeastern University's Healthy Lifestyles Guided Self-Change (GSC) program offers a unique, short-term, evidence-based, non-12-step alternative treatment for individuals presenting with alcohol or drug use concerns. Additionally, Cognitive behavioral interventions are provided for clients looking to make healthy lifestyle changes such as address insomnia, improve health through exercise and eating healthier, quit tobacco/nicotine use, or make other health-related changes. Practicum students will conduct comprehensive substance use evaluations, provide individual therapy and co-facilitate tobacco cessation groups. There may be opportunities to co-facilitate groups at the Broward Outreach Center in Hollywood Florida. Requirements and training: Each student is required to take the Substance Use, Health and Mental Health Course in the summer prior to starting practicum to obtain foundational training on the effects of substance use on mental health, diagnosis and treatment of substance use disorders. Throughout practica, students will obtain additional training on the Guided Self-Change Model, Cognitive Behavioral Therapy for Insomnia (CBT-I), Tobacco Cessation, Motivational Interviewing, and Trauma Informed Care. Additional didactics and trainings will be provided by faculty and external presenters during group supervision or set training days. In the Fall semester, students will receive supervision in a group format by Dr. Jessica Ruiz. Group supervision will take place on Tuesdays from 1- 7pm. 1 hour of group supervision focused on Cognitive Behavioral Therapy for Insomnia (CBT-1) cases will be provided by Dr. Ana Fins who will also provide consultation and individual supervision as needed for sleep cases. In the winter and summer semester, each student will receive 45 minutes of individual supervision with Dr. Ruiz and also attend 3 hours of group supervision and on-going consultation and supervision from Dr. Fins on sleep cases.

Program/Site Name	NSU PSC Intensive Psychodynamic Psychotherapy Clinic (IPPC)
Address	33021 College Avenue, Ft. Lauderdale, FL 33314
Supervisor Name	Bady Quintar, Ph.D., ABPP
FL License Number	PSY 2906
Supervisor Email	badyq@nova.edu
Supervisor Phone	954-262-5751

CCE Case Available? Yes
Description of the Practicum IPPC provides diagnostic and in-depth treatment to patients with moderate to severe personality disorders who would benefit from a more intensive dynamic approach. A variety of dynamic approaches are utilized to conceptualized cases (e.g., object relations, supportive-expressive, etc). All testing is based on supervisor approval and availability. PSC clinic training, peer group supervision mandatory (Friday 10-12pm), In-Service meetings (Friday 12-2pm). Psychodynamic coursework is strongly encouraged. Must be receptive to direction and supervision. Students must take: Psychometric and projective testing coursework prior to administering projective measures in the clinic. Courses in psychodynamic 1 and 2 are required. Dr. Quintar will provide 1 hr ind supervision and 2 hr Fri morning Lecture Series & case synthesis presentation. Peer group supervision led by an advanced student/coordinator. Some evening hours should be expected as the majority of our patients will be adults. Varies for direct clinical contact hours.
Primary Client/Patient Populations Served • Individuals • Adolescents (13-18) • Adults (19-64) • Older Adults (65+) • Couples • Family • College Students • Military Active Duty / Veterans • Unhoused • LGBTQ+
Primary Treatment Modalities • Psychodynamic Therapy
Primary Assessment Types • Intelligence • Objective Personality • Projective Personality
Trainee Requirements • Background Check Level 2 • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test • Other: Interview
Must take psychodynamic 1(summer) & 2 (fall) while in the practicum. Reading of psychodynamic material is suggested.

a. First Year

Program/Site Name	NSU PSC Neuropsychology Assessment Clinic (NAC)
Address	3301 College Avenue, Fort Lauderdale, FL 33314
Supervisor Name	Charles Golden, Ph.D. & Gesenia Sloan-Pena, Psy.D
FL License Number	FY5226/PY9976
Supervisor Email	goldench@nova.edu/gsloanpe@nova.edu
Supervisor Phone	9546631004/9542625841

CCE Case Available? No	
Description of the Practicum	
During the practicum, students attend a weekly group supervision (usually one morning) and a weekly two-hour didactic (in the afternoon) which are both required. Students are expected to spend a minimum of 15 hours a week in direct services (testing), scoring, writing and training. Due to ,students needing not only to meet with patients but also score and write up tests, total time commitments for students are at least 15 hours for first year practicum and 20 for second year practicum. Students with questions should discuss with Dr. Golden before electing this practicum.	
Primary Client/Patient Populations Served	
• Children (under 13) • Adolescents (13-18) • Adults (19-64) • Older Adults (65+) • College Students • Other Sports Medicine	
Primary Treatment Modalities	
• Neuropsychology	
Primary Assessment Types	
• Achievement and Aptitude • Intelligence • Neuropsychological • Objective Personality • Projective Personality	
Trainee Requirements	
• Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test	
In order to see clients in NAC, students must be fully trained on the adult and child tests used in NAC. Students may learn on their own prior to entering, but all are required to attend daily training (adjusted to your schedule) during second summer session to demonstrate proficiency and start practice subjects. This training may be skipped if proficiency is demonstrated. Failure to learn the tests will result in delays in seeing clients and lower first semester grades. It is estimated hat the second summer session will require 10-20 hours per week. Students unable to meet this commitment should not apply to NAC as they would find themselves behind in getting to see clients on a timely basis.

CCE Case Available? Yes	
Description of the Practicum	
SPACI specializes in providing comprehensive psychological evaluations and preparing integrated reports for children (ages 3+), adolescents, and adults, addressing both academic and psychiatric concerns. These evaluations assess a range of areas, including intellectual and cognitive functioning, executive function skills, academic performance, adaptive behaviors, and social/emotional/behavioral functioning. Common concerns and diagnoses include neurodevelopmental disorders, anxiety and mood disorders, trauma-related disorders, and conduct or behavioral issues, among others. Additionally, practicum students at SPACI offer individual and family psychotherapy, both short- and long-term, using a variety of therapeutic approaches.	
Primary Client/Patient Populations Served	
• Individuals • Children (under 13) • Adolescents (13-18) • Adults (19-64) • Family • College Students • LGBTQ+	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Play Therapy • Dialectical Behavior Therapy • Other: Unified Protocol	
Primary Assessment Types	
• Achievement and Aptitude • Intelligence • Objective Personality • Projective Personality • Other: Neurodevelopmental	
Trainee Requirements	
• Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test	

SPACI trainees attend: - 1 hour weekly group supervision - 1 hour weekly didactic seminar - 1 hour weekly (minimum) individual supervision - 30 minutes weekly administrative meeting Evening and Saturday hours are at the trainee's discretion. Direct client contact hours are approximately 40% of required hours.

Description of the Practicum - Readings and trainings prior to start date are required. - At least one evening per week (until 9pm) - Individual supervision (50 minutes); group supervision (3 hours; Mondays 9am-12pm); peer supervision (30-45 minutes); didactics (2 hours, every other Friday, 12pm-2pm). - Direct clinical contact includes 10-12 hours/week. - Required coursework: Trauma, Abuse, & Dissociation class (offered in Summer prior to practicum start). Post-traumatic stress disorders class (offered in Fall during practicum). - 2nd year trainees will be expected to have a minimum caseload of 4-6 direct hours per week, with the expectation that this increase to 6-8 hours. 3rd year trainees will be expected to have a minimum caseload of 6-8 hours per week, with the expectation that this increase to 8-10 hours.
Primary Client/Patient Populations Served - Individuals - Groups - Outpatient - Adults (19-64) - Older Adults (65+) - Couples - College Students - Military Active Duty / Veterans - Unhoused - LGBTQ+
Primary Treatment Modalities - Behavioral/Cognitive Behavioral Therapy - Acceptance and Commitment Therapy - Interpersonal Therapy - Exposure Therapy - Harm Reduction - Mindfulness - Psychodynamic Therapy - Dialectical Behavior Therapy - Other social-justice and affirmative care integrative treatments; relational therapy
Primary Assessment Types - Intelligence - Objective Personality - Projective Personality - Other: routine outcome monitoring
Trainee Requirements

- Background Check Level 2
- Fingerprinting
- Medical Marijuana Use prohibited (i.e., not allowed)
- Drug Test
- Other: Students in their third year (2nd practicum site) should meet with Dr. Ellis to discuss a pairing; interviews are required

Familiarity and knowledge of trauma-informed care principles and the challenges of working with clients presenting multiple comorbidities is highly desirable. Must have prior experience working with complex, high-risk clients. This can be demonstrated through: a clinical placement involving direct client contact; a research placement that included hands-on participant interaction (e.g., delivering interventions, administering assessments, or conducting interviews); volunteer experience where direct services were provided e.g., work on a crisis hotline or in similar high-stakes environments). Strongly suggested attributes include: a demonstrated understanding of and commitment to working with individuals from minoritized identities, underserved populations, and those who have been historically undertreated; an ongoing dedication to cultural humility and proficiency in clinical practice, including awareness of systemic barriers and their impact on mental health. Trainees are required to take PSY4679 over the summer prior to practicum start date.

Supervisor Name	Holly Katz, Ph.D.
FL License Number	PY5945
Supervisor Email	h.katz@faulkcenter.org
Supervisor Phone	5614835300

CCE Case Available? Yes	
Description of the Practicum	
Trainees provide individual, couples, family, and group counseling as well as psychological testing services to children, adults, and seniors who otherwise could not afford private treatment. Interventions are evidence-based and draw on multiple theories, such as Acceptance and Commitment Therapy, Dialectical Behavior Therapy, Cognitive-Behavioral Therapy, Client-Centered Counseling, and Family Systems counseling. Most trainees have a caseload of 5-6 therapy clients and complete two to three psychological batteries per year. Practicum students spend most of their time at the Faulk Center, which is located at 22455 Boca Rio Road, Boca Raton, Florida. Practicum students also travel once or twice per week to provide group counseling at a Palm Beach County school and/or support group services at a senior adult facility in Broward or Palm Beach Counties. Clients served at our Boca Rio location and in our outreach programs are diverse in terms of age, presenting problems, diagnoses, and ethnicity. Depressive disorders, bipolar disorders, anxiety disorders, personality disorders, obsessive-compulsive disorders, trauma and stress disorders, impulse-control and conduct disorders, and neurodevelopmental disorders are commonly a focus of treatment. The Faulk Center for Counseling is open M-W 9-9 p.m., Th-F 9-5 p.m. Mandatory meetings: Wednesdays 1-2 p.m. and Wednesday OR Friday from 9-11 a.m. Practicum students work one additional morning in the schools, not counted for above. Practicum students work a minimum of one evening (Mon-Wed) until 9 p.m. Practicum students should expect to work 15-20 hours per week.	
Primary Client/Patient Populations Served	
• Individuals • Groups • Outpatient • Children (under 13) • Adolescents (13-18) • Adults (19-64) • Older Adults (65+) • Couples • Family • College Students • LGBTQ+	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Exposure Therapy • Marriage and Family Therapy • Play Therapy • Harm Reduction • Mindfulness	

• Psychodynamic Therapy • Dialectical Behavior Therapy
Primary Assessment Types
• Achievement and Aptitude • Intelligence • Objective Personality • Other Projective Measures may be used, but less often
Trainee Requirements
• Spanish speaking preferred • Background Check Level 2 • Fingerprinting • Other: transportation to outreach programs
Previous therapy and psychological testing experience preferred.

CCE Case Available? No	
Description of the Practicum	
In this inpatient pediatric hospital setting, the practicum student receives experience providing therapeutic interventions on an inpatient and outpatient basis with children, adolescents, young adults, and families managing acute and chronic medical conditions. Training opportunities are within the pediatric solid organ transplant programs (heart and kidney), hematology/oncology service, hemodialysis unit, adolescent bariatric surgery program, and inpatient consultation-liaison services. Students will each be assigned to one of two full-year rotations: (1) solid organ transplant, dialysis, inpatient consultation-liaison services; (2) hematology/oncology, adolescent bariatric surgery. At least 1 hour of individual supervision with site supervisor weekly and additional supervision will be available as needed. Students will participate in weekly interdisciplinary team meetings, attend multidisciplinary rounds, and collaborate closely with interdisciplinary team members (physicians, social worker, child life specialists, nursing, integrative therapists [music, art, yoga, gaming, and pet therapies], and rehabilitation therapists). Direct clinical contact varies dependent on caseload and inpatient volumes. Opportunities to attend Pediatric Grand Rounds, Schwartz Rounds, didactics/seminars, peer supervision with psychology fellows, and other optional training experiences will be available throughout the year.	
Primary Client/Patient Populations Served	
• Individuals • Groups • Inpatient • Outpatient • Children (under 13) • Adolescents (13-18) • Family • Other Young adults followed by pediatric providers	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy • Other individualized based on patient need	
Primary Assessment Types	
• Other some brief evals with oncology patients	
Trainee Requirements	
• Background Check Level 1 • Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed)	

- Drug Test
- Proof of Immunization
- Other: TB Screening; CPR Certification (BLS for Healthcare Providers from AHA or the Red Cross only)

Previous practicum experience working with children and adolescents required. Prior completion of, or enrollment in the NSU Pediatric Psychology course during the training year, is required. Completion of any other health psychology courses related to interventions and consultation-liaison work with children, adolescents, and families is encouraged. Web-based orientation/onboarding and trainings are expected to be completed through Complio prior to start date. There is an onboarding fee.

Program/Site Name	Lifeskills Behavioral Health
Address	1431 SW 9th Ave, Deerfield Beach, FL 33441
Supervisor Name	David Ockman, Psy.D., CAP
FL License Number	PY6568
Supervisor Email	david.ockman@lifeskillsbh.com
Supervisor Phone	(954) 834-5280

CCE Case Available? Yes
Description of the Practicum The practicum experience at Lifeskills South Florida provides trainees with a structured, clinically rich opportunity to develop professional competence within a dual-diagnosis residential and partial hospitalization setting. Practicum students function as emerging clinicians-in-training and are expected to maintain professional conduct at all times, including punctuality, appropriate clinical attire, respectful communication, and consistent demonstration of integrity and accountability. Interns must follow all confidentiality policies, including strict adherence to HIPAA guidelines and the ethical codes of their governing professional organizations, and are required to immediately consult their supervisor regarding any concerns related to ethics, safety, boundaries, or client welfare. Throughout the practicum, trainees participate in a wide range of clinical responsibilities aligned with their level of training, such as observing and assisting with intakes, co-facilitating or observing group therapy sessions, engaging in clinical observations, and contributing to treatment team meetings. Under supervision, interns develop skills in case conceptualization, treatment planning, and evidence-based intervention strategies while learning to maintain appropriate therapeutic boundaries and support the milieu in a professional and therapeutic manner. Interns are responsible for completing accurate, timely, and clinically appropriate documentation in BestNotes or the designated EHR system, including progress notes, group notes, session summaries, and other required records. They are expected to communicate proactively with supervisors regarding absences, emergencies, or scheduling issues, seek clarification when uncertain about protocols or clinical decisions, and actively incorporate feedback to support continued professional growth. Before engaging in client care, trainees participate in a comprehensive orientation that includes training on facility procedures, safety protocols, confidentiality requirements, documentation standards, crisis intervention guidelines, and the interdisciplinary treatment model used at Lifeskills. Supervision is a central component of the practicum, and interns receive weekly individual supervision as well as group supervision or case conferences when available, allowing them to present cases, review documentation, and receive ongoing guidance and support from licensed clinicians. Trainees are expected to be on-site consistently during agreed-upon days and hours, typically aligning with core clinical programming times, which include morning meetings, therapeutic groups, and interdisciplinary team discussions. They are integrated into the collaborative treatment environment and learn to coordinate care with therapists, psychiatrists, nurses, case managers, and other professionals. Midpoint and final evaluations are conducted to assess progress in clinical skill development, professionalism, documentation competency, ethical adherence, communication, and overall readiness for increased clinical responsibility. As appropriate and based on competency, interns may also have opportunities to observe psychiatric evaluations, participate in psychoeducation development, assist with treatment planning, or gain exposure to multiple levels of care across residential and PHP settings. Overall, the Lifeskills practicum is designed to immerse trainees in meaningful, supervised clinical practice while fostering the development of strong professional identity, ethical practice, and competence in working with complex mental-health and substance-use presentations. Primary Client/Patient Populations Served

• Individuals • Groups • Residential • Adults (19-64) • Older Adults (65+) • Family • Military Active Duty / Veterans • Unhoused • LGBTQ+
Primary Treatment Modalities
• Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Exposure Therapy • Marriage and Family Therapy • Mindfulness • Neuropsychology • Psychodynamic Therapy • Dialectical Behavior Therapy
Primary Assessment Types
• Achievement and Aptitude • Intelligence • Neuropsychological • Objective Personality
Trainee Requirements
• Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test • Proof of Immunization
Prerequisite Training, Competency, and Experience Requirements Enrollment in an accredited graduate program (Master's or Doctoral) in Counseling, Clinical Psychology, Social Work, Marriage and Family Therapy, or a related mental-health field. Completion of core coursework, including: Counseling theories and techniques Ethics and professional standards Psychopathology / diagnosis Human development Assessment and basic clinical skills Foundational clinical competencies, such as: Basic rapport-building and communication skills Reflective listening and empathy Beginning-level case conceptualization Ability to maintain therapeutic boundaries Readiness to work in a clinical environment, demonstrating: Emotional maturity, stability, and professionalism Ability to engage respectfully with individuals experiencing significant mental-health and substance-use issues Capacity for self-awareness and openness to feedback Ability to follow supervision, including: Willingness to learn, ask questions, and accept constructive feedback Ability to apply supervisor guidance to clinical work Basic familiarity with ethical and legal standards, including confidentiality, HIPAA requirements, and mandated reporting obligations. Prior clinical or human-services experience (preferred but not required): Volunteer experience, crisis lines, residential settings, or behavioral health exposure Group facilitation or milieu engagement experience is beneficial Professional readiness, including: Strong organizational skills Effective written and verbal communication Ability to function within a multidisciplinary treatment team

Description of the Practicum Inpatient and outpatient psychotherapy and support for patients undergoing cancer treatment at all stages of disease including diagnosis, treatment, end of life and survivorship. We also work with patient family members for caregiver and grief support. An emphasis is placed on our inpatient bone marrow transplant program. Students will have opportunity to provide these services at the Memorial West (Pembroke Pines) and Regional (Hollywood) locations if desired and available with their schedule. In addition, students can participate in innovative program developments such as posting psychology related social media content, developing and running groups, and working with multidisciplinary teams on how best meet patient needs. Hours: 15-20 hours total-Practicum students will meet for a minimum one hour weekly for individual supervision (time and day to be determined), supervised inpatient rounds, 15 clinical contact hours. Students must also be available at least one morning a week (8-11:30 am) for inpatient rounds.
Primary Client/Patient Populations Served • Individuals • Inpatient • Outpatient • Adults (19-64) • Older Adults (65+) • Couples • LGBTQ+ • Other Oncology Patients
Primary Treatment Modalities • Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Mindfulness • Dialectical Behavior Therapy • Other Existential
Primary Assessment Types • Other: Self report screeners for anxiety, mood, cognitive difficulties
Trainee Requirements • Spanish speaking preferred • Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed)

- Drug Test
- Proof of Immunization
- Proof of Health Insurance
- Other: White lab coat

Second practicum students only Other: Interview required; Medical and religious exemption of any of the above provided on case by case basis PREFERRED (NOT REQUIRED):should not be rule out criteria for qualified and interested student -Health psychology experience or classes

Description of the Practicum	
The Sleep Center will provide the student with experience working in a multidisciplinary team, including neurologists, pulmonologists, psychiatrists, and a psychologist. The student will learn about sleep medicine diagnostics (International Classification of Sleep Disorders), conduct patient interviews, interpret sleep study results, review CPAP usage reports and explore treatments for various sleep disorders. Psychology students will receive specialized training in behavioral sleep medicine, including cognitive-behavioral therapy (CBT) for insomnia and enhancing adherence to CPAP. Training in behavioral therapy for nightmare disorder is also available. The student may also have the opportunity to assist in sleep-related research projects.	
Primary Client/Patient Populations Served	
• Individuals • Adults (19-64) • Older Adults (65+) • Military Active Duty / Veterans	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy	
Primary Assessment Types	
• Other Brief questionnaires of symptoms	
Trainee Requirements	
• Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test • Other: Background Check, if yes level: VA performs this	
Previous practicum experience is helpful; experience working in a hospital/medical setting is helpful.	

b. Second only

CCE Case Available? No
Description of the Practicum Trainees work with physician specialists and allied health providers to conduct clinic-based, brief assessment, consultation, and intervention of children with diabetes, comorbidities associated with obesity, and pediatric gastrointestinal concerns. Trainees also provide frequent pediatric risk assessment and outpatient therapy services in the context of an integrated health setting. Trainees may also provide group outpatient services and assist pediatric medical residents with psychosocial didactics/training. Onsite and live supervision during clinic will be primary method of supervision. Individual/group supervision will also be provided. Interns and advanced students may provide umbrella supervision. The majority of hours are completed during regular business hours. A small outpatient caseload will often be followed in the evenings via telemental health (3-5 cases per week). On occasion evening hours will be necessary to complete documentation, run groups, etc. Direct clinical hours are approximately 6 hours/week.
Primary Client/Patient Populations Served - Individuals - Groups - Inpatient - Outpatient - Children (under 13) - Adolescents (13-18) - Adults (19-64) - Family - College Students - LGBTQ+ - Other Patients in pediatric specialty care
Primary Treatment Modalities - Behavioral/Cognitive Behavioral Therapy - Acceptance and Commitment Therapy
Primary Assessment Types Other Brief screeners and Clinical interviews
Trainee Requirements - Spanish speaking preferred - Background Check Level 1 - Background Check Level 2 - Fingerprinting - Medical Marijuana Use prohibited (i.e., not allowed)

- Drug Test
- Proof of Immunization
- Proof of Health Insurance

Previous practicum experience working with children and families is strongly recommended and preferred. Coursework related to child intervention and pediatric psychology can be helpful as well. Completion of the hospital's Allied Health Student Orientation (link will be emailed 1 month prior to start) is required, as well as Basic Life Support training.

b. Second only

Program/Site Name	Nicklaus Children's Hospital - South Miami
Address	6262 Sunset Drive South Miami FL 33143
Supervisor Name	David Coe Ph.D. ABPP
FL License Number	5585
Supervisor Email	david.coe@nicklaushealth.org
Supervisor Phone	786 624-2501

CCE Case Available? No	
Description of the Practicum	
Our Developmental Behavioral Pediatrics rotation involves evaluation and short-term treatment of children and adolescents who present with assorted developmental behavior issues (e.g., Autism Spectrum, Intellectual Developmental Disorder, Attention-Deficit/Hyperactivity, Avoidant Restrictive Food Intake Disorder, Separation Anxiety, Selective Mutism, Incontinence). Clinical services are provided on an outpatient basis with behavior analysis/therapy emphasis (i.e., evidence based assessment, empirically supported treatment). Practicum students serve for 1 year (Fall through Summer semesters), expected to be on site 2 days/week (9am to 6pm).	
Primary Client/Patient Populations Served	
• Individuals • Children (under 13) • Adolescents (13-18)	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy	
Primary Assessment Types	
• Achievement and Aptitude • Intelligence • Objective Personality	
Trainee Requirements	
• Spanish speaking required • Background Check Level 3 and up • Fingerprinting • Uniform, Scrubs • Proof of Immunization • Proof of Health Insurance • Physical Examination • Physician's Statement of Readiness	
Candidates should have at least 1 year of clinical experience, be fluent in Spanish given the population we serve (Hispanic, immigrant), also comfortable working with younger children with developmental issues. Prior to start of the practicum year, students need to complete a hospital training/orientation program (e.g., Medical Examination, Background Check, Hospital Policies/Electronic Medical Records Instruction). After placement, students receive a sequential education experience geared to personal level of experience (e.g., shadow clinician, work with patient/family under direct supervision, work with patient/family independently [supervisor on site and available for immediate consultation as needed]; assignment to less complex case to start [e.g., ADHD before ASD]).	

b. Second only

Program/Site Name	Positive Solutions Psychological Services
Address	4100 South Hosptial Drive Suit

Supervisor Phone	9545834568

CCE Case Available? No
Description of the Practicum Positive Solutions Psychological Services, PLLC, is a private practice specializing in psychological assessments. We provide high-quality diagnostic interviews and comprehensive psychological evaluations to our community's most vulnerable members. Our practice serves a diverse population, with many clients referred by state and local agencies, including the Office of Disability Determinations, the Department of Children and Families, and the Department of Vocational Rehabilitation. In addition to agency referrals, we offer private evaluations, addressing a variety of referral questions, including assessments for learning disabilities, ADHD, mood disorders, and other psychological conditions. We also conduct evaluations to determine accommodations for academic and vocational settings, helping clients access the resources and support they need to succeed in school and the workplace. Our approach prioritizes culturally responsive and trauma-informed care, ensuring that each client's unique experiences and background are integrated into the assessment process. Practicum students will be able to work with clients across the lifespan and from various socio-economic, racial, and cultural backgrounds, contributing to a rich and rewarding training experience. We are committed to equipping our practicum students with the skills and knowledge necessary to excel in their clinical practice, while making a meaningful impact in the communities we serve.
Primary Client/Patient Populations Served - Individuals - Outpatient - Children (under 13) - Adolescents (13-18) - Adults (19-64) - Older Adults (65+) - Military Active Duty / Veterans - Unhoused - LGBTQ+
Primary Treatment Modalities - Neuropsychology - Other Psychological Assessment
Primary Assessment Types - Achievement and Aptitude - Intelligence - Objective Personality - Projective Personality
Trainee Requirements Background Check Level 1

Practicum students are expected to possess technical skills in administration, scoring, and writing reports for psychological assessments. They should also have a foundational understanding of clinical documentation and informed consent. Furthermore, students must be able to analyze test results to draw integrated conclusions about an individual's psychological functioning. They need to recognize how cultural and contextual factors may influence these results.

b. Second only

Program/Site Name	South Florida State Hospital, Department of Psychology - Forensic
Address	800 East Cypress Drive

CCE Case Available? Yes
Description of the Practicum Barry University's Counseling Center is dedicated to supporting the mental health and well-being of a diverse student body, which includes individuals from various cultural, socioeconomic, and marginalized backgrounds. The Center provides inclusive and accessible services to undergraduate and graduate students. Common presenting concerns include anxiety, depression, relationship challenges, academic stress, and trauma. The Center fosters student well-being and resilience through individual and group counseling, crisis intervention, outreach programs, and comprehensive psychoeducational assessments. Second year practicum students are required to complete 20 hours per week being on site 2 1/2 days while elective practicum students are expected to complete 15 hours per week being on site 2 days. Approximately 60% of the weekly hours will be devoted to direct clinical service. As part of our commitment to community engagement, practicum students may occasionally be required to participate in outreach programs during evening and/or weekend hours on an as-needed basis. This hands-on experience facilitates the development of clinical and outreach skills. Supervision is central to our training model; trainees receive 1–2 hours per week of individual supervision and 2 hours per week of group supervision, which incorporates didactic instruction, case conferences, and interdisciplinary team meetings to support the practicum student's clinical and professional development.
Primary Client/Patient Populations Served • Individuals • Groups • Outpatient • Adults (19-64) • College Students • LGBTQ+
Primary Treatment Modalities • Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Exposure Therapy • Harm Reduction • Mindfulness • Psychodynamic Therapy • Dialectical Behavior Therapy • Other Brief/short-term therapy
Primary Assessment Types • Achievement and Aptitude • Intelligence

• Objective Personality • Projective Personality
Trainee Requirements
• Background Check Level 2 • Medical Marijuana Use prohibited (i.e., not allowed)
Barry University's Counseling Center offers training opportunities to both second and third (elective) year practicum students.

c. Second, Elective

Program/Site Name	Center for Cognitive Neuroscience and Aging -University of Miami
Address	1695 NW 9th Avenue, Suite 3202, Miami, Florida 33136
Supervisor Name	Alexandra Ortega, PsyD
FL License Number	PY11813
Supervisor Email	axo623@miami.edu
Supervisor Phone	(305)355-9089

CCE Case Available? No	
Description of the Practicum	
The practicum at the University of Miami's Center for Cognitive Neuroscience and Aging (CNSA) provides doctoral trainees with comprehensive, hands-on training in neuropsychological assessment within a culturally diverse, community-based research setting. Students gain experience working across multiple federally and state-funded aging research programs, including NIH/NIA R01 studies, the Florida Department of Health (FLDOH), and the 1Florida Alzheimer's Disease Research Center (ADRC). Trainees receive supervised instruction in clinical interviewing, standardized cognitive testing, case conceptualization, and interpretation of neuropsychological data, with a focus on early detection of Alzheimer's disease and related disorders. Most evaluations are conducted on-site at the medical campus; however, students may also participate in select home-based and community-based assessments alongside CNSA research fellows and international medical graduates. In addition to research responsibilities, students now have expanded exposure to clinical neuropsychology through the CNSA's memory disorders and neuropsychological consultation services, where we provide full neuropsychological evaluations (intake, testing, and feedback). Trainees may have opportunities to assist with clinical cases depending on developmental level and scheduling. The practicum includes participation in weekly didactics, interdisciplinary consensus conferences, supervised home visits, fact-finding exercises, and opportunities for involvement in scientific presentations or posters. This practicum is ideal for students seeking strong foundations in neuropsychological assessment, geriatric populations, and research in aging and cognition. Students with Spanish bilingual proficiency are strongly encouraged to apply, as many of our funded studies focus on Hispanic/Latino older adults, and our neuropsychological clinic serves a predominantly Spanish-speaking population. As a result, bilingual trainees are in high demand and receive robust, specialized supervision to support culturally and linguistically appropriate assessment practices.	
Primary Client/Patient Populations Served	
• Outpatient • Older Adults (65+)	
Primary Treatment Modalities	
• Neuropsychology • Other Research	
Primary Assessment Types	
• Intelligence • Neuropsychological • Objective Personality	
Trainee Requirements	

- Spanish speaking preferred
- Background Check Level 1
- Fingerprinting
- Uniform, Scrubs
- Proof of Immunization
- Physical Examination
- Parking fees, if yes cost: 5USD per day

The CNSA practicum welcomes trainees across a range of training levels, from first-time practicum students to advanced trainees seeking specialized neuropsychological experience. Because our program provides highly structured, research-based neuropsychological training, no specific prior practicum experience is required. Instead, we emphasize readiness to learn, professional maturity, and alignment with the goals of our center. While no single type of experience is required, students should enter the practicum ready to:

- Learn standardized neuropsychological assessment procedures
- Engage in research-based cognitive evaluation
- Participate in multidisciplinary consensus discussions
- Adapt to both clinic-based and home-based evaluations

c. Second, Elective

Program/Site Name	Child and Adolescent Mood and Anxiety Treatment Program (CAMAT) at the University of Miami
Address	5665 Ponce De Leon Blvd, Coral Gables, FL 33146
Supervisor Name	Danielle Ibarra, PsyD
FL License Number	PY12819
Supervisor Email	d.ibarra@umiami.edu
Supervisor Phone	305-284-6179

CCE Case Available? Yes

Description of the Practicum
The Child and Adolescent Mood and Anxiety Treatment (CAMAT) program in the Department of Psychology at the University of Miami is a clinical research program dedicated to developing and testing state-of-the-art psychotherapy approaches for emotional disorders in children and adolescents. Training in evidence-based practices (The Unified Protocols for Transdiagnostic Treatment of Emotional Disorders in Children and Adolescents; Comprehensive Behavioral Intervention for Tics) will be provided. Second-year trainees are expected to maintain a caseload of 5 individual clients in addition to 1 UP-C group client. Elective practicum students are expected to maintain a caseload of 4 individual clients in addition to 1 UP-C group client. Trainees will co-facilitate UP-C parent or child group one night per week. Individual clients are typically scheduled between the hours of 3pm and 7pm, Monday-Thursday. Clients cannot be seen past 8pm. Fridays are reserved for rescheduled sessions. After completing their DIAMOND-KID training, trainees are required to maintain a 2-hour weekly assessment slot that works consistently with their schedule. Trainees are expected to complete their assessment by the end of the fall semester. Trainees will receive 1 hour of supervision for UP-C group weekly and 2 hours of supervision for their individual clients weekly in a group format. Trainees will also participate in a 1-hour role-play group with an experienced CAMAT clinician weekly during the fall semester to familiarize themselves with the UP-C/A manuals. All CAMAT clinicians are required to attend weekly intake meetings in person on Wednesdays from 1pm-2:30pm. Trainees are expected to complete their intake assessments and to see their therapy clients in person at the Coral Gables campus. There will be a mandatory two-day in-person training the week of August 10th-15th, 2026, before the start of practicum. If trainees are interested, opportunities to participate in research projects and outreach events are available.
Primary Client/Patient Populations Served
• Outpatient • Children (under 13) • Adolescents (13-18)
Primary Treatment Modalities
• Behavioral/Cognitive Behavioral Therapy • Comprehensive Behavioral Intervention for Tics (CBIT)
Primary Assessment Types
• Other: Diagnostic Assessment
Trainee Requirements
• Spanish speaking preferred • Background Check Level 2 • Parking fees, if yes cost: \$42/month
Trainees at CAMAT must have at least one year of previous experience at a therapy-focused practicum site. Experience at a child or adolescent-focused practicum site is preferred, but not required.

c. Second, Elective

Program/Site Name	ChildNet Program
Address	1100 W McNab Rd Fort Lauderdale, FL 33309
Supervisor Name	Quina Munson, Psy.D.
FL License Number	PY7632
Supervisor Email	quina.munson@childnet.us
Supervisor Phone	954-793-0626

CCE Case Available? Yes	
Description of the Practicum	
ChildNet is a foster care case management agency that also provides clinical intervention and treatment within the dependency court system. Within this program, students will have the opportunity to conduct individual and family therapy with children, adolescents, and adults, many of whom were court-mandated for treatment. Students are also required to facilitate therapeutically supervised visitations between parents and children actively involved in the dependency system, as well as complete treatment plans, participate in court hearings, and assist in multi-disciplinary treatment team meetings and staffings. There are optional opportunities to facilitate support groups for relative caregivers and foster parents utilizing a psychoeducational approach.	
Primary Client/Patient Populations Served	
• Individuals • Outpatient • Children (under 13) • Adolescents (13-18) • Adults (19-64) • Older Adults (65+) • Family • Unhoused	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Marriage and Family Therapy • Play Therapy	
Primary Assessment Types	
• N/A	
Trainee Requirements	
• Background Check Level 1 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test	
This is a practicum site that requires strong organizational skills and a willingness to work collaboratively with case managers, school personnel, Guardian Ad Litems, attorneys, and other professionals. You must be highly motivated, able to work independently, and possess a strong understanding of the underlying dynamics of community mental health, the legal system, and various psychosocial factors that influence overall compliance and engagement in psychotherapeutic services with a highly resistant population.	

c. Second, Elective

Supervisor Phone	3055859422

CCE Case Available? No
Description of the Practicum This placement provides the student with a comprehensive experience in treating patients with a variety of medical conditions and injuries, both in acute care and rehabilitation settings. Intakes, follow up individual interventions with patient and/or family, and co treatments are part of the experience. We work closely with an interdisciplinary team geared toward maximizing the patient's physical and psychological function. Often, we are utilizing data points gathered from intake, cog or emotional screeners to optimize patient's function.
Primary Client/Patient Populations Served • Individuals • Adults (19-64) • Older Adults (65+) • Family • Unhoused • LGBTQ+
Primary Treatment Modalities • Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Mindfulness • Other Motivational Interviewing
Primary Assessment Types • Other Cognitive & Emotional Screeners
Trainee Requirements • Spanish speaking preferred • Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Uniform, Scrubs
1) How to perform intakes. 2) How to perform basic cog & emotional screeners (i.e. MOCA, MMSE, BDIII, PHQ, PCL). 3) How to perform basic H&B interventions.

c. Second, Elective

Program/Site Name	Division of Neuropsychology and Cognitive Neuroscience/University of Miami School of Medicine/Department of Neurology
Address	1120 NW 14 st, Suite 1337, Miami, FL 33136

Supervisor Phone	3052433100 x2

CCE Case Available? No	
Description of the Practicum	
This advanced practicum is for students with experience in neuropsychological testing and who have a basic understanding of brain-behavior relationships. Students will be prioritized from the Neuropsychology track, who have taken some neuroscience and neuropsychology courses and received supervision in neuropsychological assessment. Practicum requires a 16 hour (two days per week) commitment. Students are assigned one evaluation case per week and will receive intensive supervision on their clinical work on a weekly basis. This is an in-person practicum but there are also, on occasion, telehealth virtual assessments to accommodate patients requesting remote testing due to transportation or mobility issues. There are ample didactic opportunities with mandatory division rounds (Fridays at 11 am). Neuropsychology rounds offer an opportunity to review individual cases with faculty and interact with other practicum students and post doctoral fellows during a case conference. Other optional but strongly recommended conferences and rounds include interdisciplinary Neurology faculty rounds, epilepsy and DBS surgical conferences, fact finding didactics and ethics rounds. A major advantage is that the Division of Neuropsychology and Cognitive Neuroscience is based in the Department of Neurology and considered an integral part of the Department, making it possible for students to engage directly with all faculty in Neurology. Further, our training program follows the Houston and Minnesota Conference model for specialty training in clinical neuropsychology through the American Board of Professional Psychology (ABPP).	
Primary Client/Patient Populations Served	
• Individuals • Children (under 13) • Adolescents (13-18) • Adults (19-64) • Older Adults (65+) • College Students	
Primary Treatment Modalities	
• Neuropsychology	
Primary Assessment Types	
• Achievement and Aptitude • Intelligence • Neuropsychological • Objective Personality • Other Psychological and Emotional Assessments	
Trainee Requirements	

- Spanish speaking preferred
- Background Check Level 2
- Fingerprinting
- Drug Test
- Proof of Immunization
- Proof of Health Insurance
- Physical Examination
- Physician's Statement of Readiness
- Parking fees, if yes cost: \$8
- Other: Interview, TB Screening

Outpatient neuropsychological assessment involves an in-depth immersion in brain behavior relationships. Students will work closely with all faculty in the Division of Neuropsychology and Cognitive Neuroscience as well as Department of Neurology faculty. All students will learn a core test battery and receive additional training in supplemental testing to best address a patients' referral question. Students will gain experience in wide range of neurological disorders including traumatic brain injury, epilepsy, infectious diseases, brain tumors, toxic exposures, Alzheimer's disease and related dementias, hydrocephalus, movement disorders, multiple sclerosis, anoxic events, sleep disorders, tumors, and vascular disease. While our populations predominantly involve adults (18-90+ years), the sports neurology division provides interdisciplinary clinic experiences in assessing adolescents and young adults that have sustained sports and non-sports related concussions or traumatic brain injuries. In addition, students will have the opportunity to conduct pre- and post-surgical evaluations for epilepsy and deep brain stimulation (DBS) and participate in pre-surgical interdisciplinary epilepsy and DBS conferences, brain mapping, and WADA procedures. These interdisciplinary experiences are invaluable for the trainee to learn first hand how a clinical neuropsychological plays a vital role as part of a dedicated interdisciplinary surgical team. There are also opportunities for inpatient bed-side examinations. Supervision and division meetings are offered both in-office and on telehealth. As mentioned above, students will also be trained in cutting-edge telehealth remote assessments for patients who cannot make an in-person evaluation due to limited transportation and /or mobility capacity.

c. Second, Elective

Program/Site Name	Elements Psychological Health Inc.
Address	420 S State Rd 7, Suite 106 Royal Palm Beach Florida, 33414

CCE Case Available? Yes
Description of the Practicum At Elements Psychological Health Inc., doctoral-level students have the opportunity to complete their practicum hours in a supportive and comprehensive clinical setting. Practicum students will observe and engage providing therapeutic interventions with a diverse client population. Services provided by the supervising psychologist include servicing the lifespan by completing diagnostic intakes, individual therapy (e.g., ADHD, ODD, anxiety, depression, OCD, marital concerns, and stress-related issues), family therapy, and couples counseling. Students will also have opportunities to shadow and collaborate with the psychologist in administering comprehensive psychological evaluations, ESA assessments, and other developmental assessments used to diagnose learning disabilities, autism spectrum disorders, and other clinical conditions. Training and supervision are available in both English and Spanish. Dr. Yumart holds a contract with the Department of Disability and Social Security to support underserved populations by providing therapeutic services and comprehensive evaluations that connect individuals with essential resources and benefits. Students will be able to participate in these services and providing recommendations. Additionally, practicum students may have the option to observe Registered Behavior Technicians (RBTs) and Board Certified Behavior Analysts (BCBAs) during ABA therapy sessions and assessments conducted with children at the center.
Primary Client/Patient Populations Served • Individuals • Outpatient • Children (under 13) • Adolescents (13-18) • Adults (19-64) • Older Adults (65+) • Couples • Family • College Students • LGBTQ+
Primary Treatment Modalities • Behavioral/Cognitive Behavioral Therapy • Mindfulness • Dialectical Behavior Therapy
Primary Assessment Types • Achievement and Aptitude • Neuropsychological • Objective Personality • Projective Personality
Trainee Requirements

- Background Check Level 1

Doctoral students will receive one hour of individual supervision each week or more, in addition to weekly group supervisions. Students will also participate in didactic training on psychological assessment tools, treatment modalities and discuss cases. Practicum hours are expected to be flexible during the week (outside of class times), with the option to obtain additional hours on Saturdays. Students should have completed their core assessment courses, as well as introductory coursework in ethics and treatment methods prior to beginning the practicum. Throughout students placement at Elementals Psychological, students will gain exposure to a wide range of diagnoses by observing therapy sessions and participating in psychological assessments across diverse age groups.

Description of the Practicum The externship training program in assessment provides supervised experience in an active university counseling center. Participation in a range of activities including therapeutic psychological assessment; assessment for ADHD and Learning Disorders; consultation and supervision from CAPS Assessment Coordinator; and consultation and peer supervision from pre-doctoral interns are included in the program. Supervision is geared to the graduate student's level of professional development. In addition, there are bi-weekly meetings with the Extern Coordinator, biweekly Diversity Development seminar, and (when possible) attendance at In-Service Trainings. All of the above formal training components will occur at the Boca Raton campus. Each trainee is required to be on the Boca Raton campus on Wednesday mornings from 9am-12pm for the training block.
Primary Client/Patient Populations Served - Individuals - Outpatient - Adults (19-64) - College Students - LGBTQ+
Primary Treatment Modalities Other Assessment
Primary Assessment Types - Achievement and Aptitude - Intelligence - Objective Personality - Other Therapeutic Assessment
Trainee Requirements - Background Check Level 2 - Fingerprinting
Completed coursework in Cognitive Assessment

Description of the Practicum

Galen Hope, which is a treatment center for adolescents and adults ages 10+ with concerns related to eating disorders, mood, personality, and psychotic disorders, with clients who have comorbid acute psychiatric concerns. Practicum students' roles include facilitating 2-3 weekly groups on themes such as ACT, DBT, Shame and Resilience, Family & Relationships, CBT, Conscious Recovery, and Therapeutic Opportunities. Students may also provide group coverage for groups such as Mindfulness, Psychodrama, and process groups, and have the opportunity to create breakout groups to adapt to varied clinical needs. Students also have the opportunity to provide weekly individual coaching sessions, working closely with 1–3 clients with severe mental illness, including Bipolar Disorder, Borderline Personality Disorder, psychotic and thought disorders, eating disorders, and trauma-related symptoms. Additionally, students will provide meal support for adolescents and adults on the eating disorder track, meeting twice a week to have meals with clients on the track. Other opportunities available to students include conducting intake assessments, monitoring assessment administration for treatment planning, and providing milieu support to clients. Supervision is offered weekly for 1 hour, and when possible, group supervision is provided weekly or bi-weekly for added support. There is also extensive work within an interdisciplinary team, and if interns' practicum days fall on staff meetings, they take part in this experience as well. The expectation is students attend two days out of the week, there is flexibility with days depending on academic schedule. Hours for practicum experience are preferred for either 9-5pm or 10-6pm

Primary Client/Patient Populations Served

- Individuals
- Groups
- Residential
- Adolescents (13-18)
- Adults (19-64)
- Family
- College Students
- LGBTQ+

Primary Treatment Modalities

- Behavioral/Cognitive Behavioral Therapy
- Acceptance and Commitment Therapy
- Interpersonal Therapy
- Exposure Therapy
- Marriage and Family Therapy
- Play Therapy
- Harm Reduction
- Mindfulness
- Dialectical Behavior Therapy

Primary Assessment Types
Other Intake & Monthly Treatment Assessment Administration
Trainee Requirements
- Background Check Level 1 - Fingerprinting
It is preferred that students have taken a group therapy course before or during the practicum experience, as the practicum is group-intensive.

c. Second, Elective

Program/Site Name	HG Doctors - Health Psychology Track
Address	4765 W Atlantic Ave; Delray Beach, FL
Supervisor Name	Dr. Daniel Martinez, PsyD (Director of Clinical Training)
FL License Number	PY11203
Supervisor Email	DMartinez@HGDoctors.com
Supervisor Phone	(561) 453-2273

CCE Case Available? Yes
Description of the Practicum Health Psychology services integrated within a Primary Medical Care outpatient clinic. Student rotation is within a health track, with primary training opportunities in consultation and liaison services, group and individual psychotherapy services, brief health-related assessments, and professional consultation with primary care and specialist providers. Secondly, when appropriate, comprehensive evaluations are available, via cross-training within HG Doctors' neuropsychological track. Please note that the health track is primarily located in our north medical clinic (Delray Beach).
Primary Client/Patient Populations Served - Individuals - Groups - Outpatient - Children (under 13) - Adolescents (13-18) - Adults (19-64) - Older Adults (65+) - College Students - Military Active Duty / Veterans - Unhoused - LGBTQ+
Primary Treatment Modalities - Behavioral/Cognitive Behavioral Therapy - Acceptance and Commitment Therapy - Interpersonal Therapy - Exposure Therapy - Play Therapy - Mindfulness - Consultation and Liaison/Health-Informed Services
Primary Assessment Types - Objective Personality - Projective Personality - Other: Surgical Readiness, Medical Educational
Trainee Requirements - Spanish speaking preferred - Background Check Level 2 - Fingerprinting - Drug Test - Uniform, Scrubs

- Other: Gas and Medical Wear Stipend Provided

There is a 1-month comprehensive training/workshop of Health Psychology training (i.e., consultation and liaison, professional consultation with medical staff, rounds, etc.). While not mandatory, students who participate in training tend to greatly appreciate the training and familiarity provided at the beginning of the training year.

c. Second, Elective

Program/Site Name	HG Doctors - Neuropsychology Track
Address	200 E Hallandale Beach Blvd; Hallandale Beach, FL 33009
Supervisor Name	Daniel Martinez, PsyD (Director of Clinical Training); Dr. Catherine Funes, PsyD (Director)
FL License Number	PY11203
Supervisor Email	DMartinez@HGDoctors.com
Supervisor Phone	561-453-2273

CCE Case Available? Yes
Description of the Practicum Neuropsychological services integrated within three Primary Medical Care outpatient clinics (Hallandale Beach, Boca Raton, and Delray Beach). Student rotation is within the neuropsychology track, with primary training opportunities in administering and interpreting testing, report writing, and feedback/professional consultation. Secondly, there are opportunities for psychotherapy (CCE cases), psychoeducational group services, community outreach and consultation and liaison with in-clinic medical providers.
Primary Client/Patient Populations Served • Individuals • Groups • Outpatient • Children (under 13) • Adolescents (13-18) • Adults (19-64) • Older Adults (65+) • College Students • Military Active Duty / Veterans • Unhoused • Other Collegiate and Professional Athletes
Primary Treatment Modalities • Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Exposure Therapy • Play Therapy • Mindfulness • Neuropsychology
Primary Assessment Types • Achievement and Aptitude • Intelligence • Neuropsychological • Objective Personality • Projective Personality • Other Vocational, Immigration Services, Pre-Surgical Services
Trainee Requirements

- Spanish speaking preferred
- Background Check Level 2
- Fingerprinting
- Drug Test
- Uniform, Scrubs
- Other: Gas and medical wear stipend provided

There is a 1–2 month comprehensive training and onboarding workshop focused on neuropsychological test administration, held on Mondays (full-day) at the start of the training year. While not mandatory, students who choose to participate consistently report that this intensive preparation significantly enhances their confidence, accuracy, and integration into our clinical workflow. Of note, given the rigorous and fast-paced nature of neuropsychological work in our practice, prior experience within a neuropsychology practicum (either within NSU or at an external site) is strongly recommended. Applicants with foundational exposure to assessment, test administration, and report formulation will be best positioned to benefit from this rotation and contribute meaningfully to patient care.

c. Second, Elective

Program/Site Name	Jackson Behavioral Health Hospital Psychology
Address	1695 NW 9th Ave, Miami, FL 33136
Supervisor Name	Ana M. Ojeda, Psy.D., ABPP
FL License Number	PY8007

Supervisor Phone	305-355-8273

CCE Case Available? No
Description of the Practicum The Child and Adolescent Acute Inpatient Unit (CAAP) provides short-term care for children and adolescents, ages 6 through 17, presenting with a wide range of severe psychiatric disorders including Mood Disorders, Anxiety Disorders, Psychosis, Developmental Disorders, Disruptive Behavioral Disorders, Adjustment Disorders, Personality Disorders, etc. The patient population is diverse, though many of the patients come from highly conflictual family dynamics, lower SES family systems, and/or have been abused and/or neglected in some manner. The CAAP unit provides practicum students with an opportunity to work alongside - the attending psychologist, psychology fellows and interns - with a high-risk child and adolescent population within an acute (average stay 3-5 days) inpatient psychiatric facility. The practicum students will be able to be part of the multidisciplinary team working closely with psychiatrists, psychiatry residents and fellows, recreation therapists, nurses, and social workers. During their time on CAAP, practicum students will have opportunities for in-vivo learning and supervision. Practicum students will facilitate DBT skills groups (i.e.: general skills group) and can co-facilitate/observe an advanced “skills application” group, provide individual therapy, co-facilitate family therapy, and assist with psychological assessments to provide the medical team with diagnostic clarification and/or treatment recommendations. Since CAAP is a DBT based milieu, practicum students can join our DBT consultation team or participate in other DBT seminars, which provides another layer of training and support while working with clinically complex patients.
Primary Client/Patient Populations Served • Individuals • Children (under 13) • Adolescents (13-18) • Family • Unhoused • LGBTQ+ • Other Foster Care
Primary Treatment Modalities • Behavioral/Cognitive Behavioral Therapy • Marriage and Family Therapy • Play Therapy • Mindfulness • Dialectical Behavior Therapy
Primary Assessment Types

- Achievement and Aptitude
- Intelligence
- Objective Personality
- Projective Personality

Trainee Requirements

- Background Check Level 2
- Fingerprinting
- Medical Marijuana Use prohibited (i.e., not allowed)
- Drug Test
- Uniform, Scrubs
- Proof of Immunization
- Proof of Health Insurance
- Other: This rotation requires at least three consecutive days with Tuesdays as a required day due to the seminar training schedule.

c. Second, Elective

CCE Case Available? No	
Description of the Practicum	
Psychological consultation is requested for a number of concerns within the hospital. Some examples include: pre-existing psychiatric issues interfering with medical treatment, acute/chronic illness-related distress, wide-ranging adjustment issues, end-of-life intervention, behavioral management strategies to assist medical teams with complex patients, poor adherence to prescribed treatment, adjustment to various forms of acute physical trauma, and pre- and post-transplant intervention(s). For instance, the miracle of organ transplantation happens more times each year at Jackson Memorial Hospital than at any other hospital in the United States. The Adult C/L team is consulted to provide assessment, interventions, and recommendations on factors that may be impacting and/or interfering both pre- and post- organ transplantation (e.g., heart/LVAD, kidney, liver, lung, multi-visceral/multi-organ transplantation).	
Primary Client/Patient Populations Served

Address	1601 NW 12th Ave
Supervisor Name	Jason Jent, PhD
FL License Number	PY7568
Supervisor Email	jjent@med.miami.edu
Supervisor Phone	305-243-6857

CCE Case Available? Yes
Description of the Practicum Commitment: Between August 10, 2026 through August 9, 2027, students will be expected to complete two to three clinical rotations for the duration of the training year that are often spread across 2-3 days or half days, one to two hours of individual/group supervision per week with two to four supervisors over the course of the practicum, and attendance at a weekly didactic seminar (one hour/week; Wednesdays from 12-1pm), which average to a total of 12 hours in the clinic each week. Most clinical rotations operate during normal business hours, though some may require early evening hours. Please note that in some cases students may need to exceed 12 hours in the clinic per week based on student preferences as most rotations require either a full day or a half day of clinical work. All students must pass Level II background checks and a 10-panel drug screen which includes testing for marijuana. All students will also be required to participate in the UM Mailman Center LEND (Leadership Education in Neurodevelopmental Disabilities) program. The LEND program goals are to provide disciplinary and interdisciplinary leadership training to improve systems of care that work towards the prevention of developmental disabilities and ensure access to family-centered, culturally competent care for children with or at risk for neurodevelopmental disabilities and other chronic conditions and their families. As part of LEND, students would be required to complete the LEND 'Understanding the Family Perspective' (UFP). This 4-week course (meets Fridays from 9am-12pm) provides trainees with an opportunity to learn core LEND principles in a small-group, interprofessional setting. Guest speakers present on related topics. Trainees work with a faculty mentor to develop a mock advocacy project (but are not required to carry it out—just propose one) as a part of the UFP. Also, prior to participation in the UFP, trainees complete online modules in advocacy, family-centered care, interprofessional teams, transition, and cultural competence (takes about 2 hours to complete). The UFP repeats every 4 weeks so the students can take it at any point in the year, including summer if it is more convenient. Prerequisites: Advanced students (4th and 5th Year) with coursework in child psychopathology, child development, child assessment, and child therapy. At least one practicum with children, preferable more. Spanish/Creole/French skills desirable but not required. Reliable transportation to and from the Mailman Center, and to and from community sites (if required by rotation). Practicum Summary: The Mailman Center's comprehensive training program provides training to doctoral level psychology students from area universities and to interns and postdoctoral fellows from programs across the United States and Canada. The program is accredited by the Committee on Accreditation of the American Psychological Association. We offer experiences in psychological assessment, evidence-based treatment, pediatric consultation and liaison, child protection, assessment and secondary prevention in at-risk populations, parent counseling, in-service training, seminars, clinical and developmental research, program evaluation, community intervention, and numerous interdisciplinary and intradisciplinary activities. Trainees gain experience with a broad spectrum of problems in a diverse cultural, ethnic, and socioeconomic pediatric population. While the faculty represents a number of theoretical positions, the program leans towards a cognitivebehavioral/ systems perspective. During the application and selection process, students rank their interest in one or more of four available clinical training tracks. Students will be interviewed rotation supervisors during the application and selection period. While students will be matched to a specific track,

the extent that they work on a specific rotation will be partially based on supervisor preference as well as practicum student availability on days of the rotation. Trainees will elect two clinical rotations (in rare instances 3 rotations) over the year. Students will receive in-depth yearlong training on the rotations that they are matched to. Clinical Training tracks include the following: Practicum Rotation Tracks (10-12 positions available overall but will limit total Nova students to 1-2 positions per year)

1. Clinical Child Psychology Track (four positions) Position 1 (two positions): Intervention: a) Pediatric Psychology Clinic (PPC)-Clinical Child Emphasis (4.5 hours) or PCIT (4.5 hours) AND b) Psychological Assessment Service (PAS; 8 hours) • Rationale: This track balances intervention and assessment experiences with children and adolescents, covering a wide range of behavioral and emotional issues. Position 2 (one position): assessment only track a) Interdisciplinary Developmental Evaluation Service (IDES) (12 hours) • Rationale: This track focuses on comprehensive assessment of children with neurodevelopmental disorders and delays, covering a wide age range and various assessment tools. Position 3 (one position): a) Child Protection Team (8 hours per week) b) PPC Clinical Child or Child Health (4.5 hours) • Rationale: This track focuses on addressing child trauma and family dynamics via assessment and interviewing and combining training with evidence-based therapy approaches.
2. Pediatric Psychology Track (four positions) Position 1 (two positions): a) Pediatric Psychology Clinic (PPC)-Child Health Emphasis (4.5 hours) AND b) Pediatric Diabetes Outpatient Clinic (8 hours) OR CF/Sleep clinic split (8 hours) • Rationale: This track focuses on psychological interventions for children with chronic health conditions, combining outpatient therapy with specialized medical clinic experience. Position 2 (one position): Hematology/Oncology (12 hours) • Rationale: Designed for individuals who have some ped psych experience already and are looking to get a blend of inpatient and outpatient experience Position 3 (one position): Pediatric Hearing Loss (12 hours) • Rationale: Designed for individuals who want to get a blend of outpatient C&L, assessment, and therapy within an interdisciplinary clinic setting.
3. Early Childhood Intervention Track (4 Positions) Position 1 (one position): a) Early Childhood Interventions (Early Discovery; 8 hours) and 4 to 4.5 hours of one of the following rotations: PCIT, Early Steps, Families First, or Parent Club • Rationale: Designed for an individual that is interested in community-based implementation of services for younger children (0-7) Position 2 (one position): a) Parent-Child Interaction Therapy (PCIT; 8 hours) and one of the following: Early Steps (4 hours) or Families First (4 hours) or Parent Club (4 hours) • Rationale: This track specializes in assessments and interventions for young children and their families, blending community-based services with evidence-based parent training. Position 3 (one position): a) HealthySteps (8 hours) and 4 to 4.5 hours of one of the following rotations: PCIT, Early Steps, Families First, or Parent Club • Rationale: This track specializes specifically in birth to three.
4. Primary Care Psychology Track (Two Positions) • Position 1: (one position) a) Pediatric Primary Care Consultation (4 hours) and b) Pediatric Mobile Clinic (8 hours) • Position 2: (one position) Community Based Integrated Primary Care: School Health Initiative (12 hours) • Rationale: This track provides experience in integrating psychological services within primary care settings, including both traditional clinic, school-based, and mobile outreach services.

Clinical Child Psychology Rotations (supervisors) include: the Psychological Assessment Service (PAS; Drs. Cuadra, Perez, and Farias); Pediatric Psychology Clinic- Clinical Child Emphasis (PPC; Dr. Weinstein); Parent-Child Interaction Therapy (PCIT; Drs. Jent, Weinstein, Davis, Garcia, Farias, and Acosta); Child Protection Team (CPT; Dr. Dandes); Early Steps (Dr. Berkovits); Early Childhood Interventions (Dr. Natale); Parent Club (Dr. Weinstein); Families First (Dr. Mansoor); and HealthySteps (Dr. Schenker). Pediatric/Health Psychology Rotations (supervisors) include: Pediatric Pulmonary/Cystic Fibrosis (Dr. Mali); Hematology/Oncology (Dr. Coto); Pediatric Diabetes (Dr. Mali); Pediatric Psychology Clinic-Child Health Emphasis (Drs. Delamater and Mali); School Health Initiative (Drs. Pulgaron and LaMarca); Pediatric Hearing Loss (Drs. Cejas and Coto); and Pediatric Mobile Clinic (Dr. Cuadra). Some rotations are offered as a half-day experience; others require a full-day commitment. Please note that while many rotations are based at the Mailman Center for Child Development, others are community-based (e.g., within schools, churches), and thus additional time and resources associated with commuting to these locations may be required. Rotations are elected for the entire year and are determined at the time of practicum program selection. A full description of the rotations, including days/times of clinic, clinical experiences offered, and trainee responsibilities and

requirements, will be presented by rotation supervisors during orientation. For a brief description, visit our website. Learning Goals and Objectives: The Mailman Center training program has a clinical child and pediatric focus, with an emphasis on interdisciplinary and multicultural diversity training throughout all clinical rotations. The program is structured to build skills in the core domains of clinical/developmental assessment, intervention, prevention, and consultation in pediatric populations within a variety of settings (e.g., outpatient therapy, medical inpatient and outpatient, schools, and other community sites). A core objective of the training program is to provide trainees with an awareness of the various roles and functions of the psychologist as an interdisciplinary team member. Practicum Student Roles and Contributions: Under the supervision of licensed clinical psychologists, trainees will conduct assessment, intervention, prevention and/or consultation with child and pediatric populations. The specific role and contributions of the trainee vary across clinical rotations and will be outlined by rotation supervisors during orientation. Supervision: Trainees will receive one to two hours of individual/group supervision from two to four supervisors over the course of practicum. Live supervision is available on many rotations. The amount, structure and approach to supervision vary according to the rotation and supervisor. Clinical Hours: Approximately 12 hours weekly from August 10, 2025 through August 10, 2026. Includes one-two hours of supervision and one hour of didactics weekly. Although many rotations build in supervision and writing time, additional time outside of clinical rotations may be required for supervision, training and preparation, and the writing of progress notes and reports. The specific clinical activities, supervision and documentation requirements vary across the rotations. This will be presented during orientation prior to the trainee's ranking of rotations. Application Process: After approval by Nova faculty, interested students should email a copy of their CV to the Mailman Training Director (jjent@med.miami.edu) and a brief letter of interest. A brief interview (Zoom) will be scheduled to discuss the practicum experience and student training goals to ensure good match.

Primary Client/Patient Populations Served

- Individuals
- Children (under 13)
- Adolescents (13-18)
- Family
- LGBTQ+

Primary Treatment Modalities

- Behavioral/Cognitive Behavioral Therapy
- Marriage and Family Therapy
- Play Therapy

Primary Assessment Types

- Achievement and Aptitude
- Intelligence
- Neuropsychological

Trainee Requirements

- Spanish speaking preferred
- Background Check Level 2
- Medical Marijuana Use prohibited (i.e., not allowed)
- Drug Test
- Parking fees, if yes cost: \$6 per day

Master's degree conferred by start of practicum.

Description of the Practicum Training focuses on acquiring the knowledge and skills required to objectively administer a wide range of neuropsychological tests in a standardized manner. The student will be involved in the selection of appropriate measures from a flexible battery approach considering each patient's unique demographic factors and cultural competence level. Patients are primarily seen from neurology, neurosurgery, internal medicine, psychiatry, and primary care. Main practice setting is the outpatient neurology clinic and some inpatient work. Participation in neurology case conferences, neurology case reviews, and epilepsy conference. Other unique clinical experience may involve brain mapping, wada procedures, and intraoperative testing. All occur at Memorial Regional Hospital.
Primary Client/Patient Populations Served - Individuals - Inpatient - Outpatient - Adults (19-64) - Older Adults (65+) - Family - Military Active Duty / Veterans - LGBTQ+
Primary Treatment Modalities Neuropsychology
Primary Assessment Types Neuropsychological
Trainee Requirements - Background Check Level 1 - Background Check Level 2 - Fingerprinting - Uniform, Scrubs - Proof of Immunization - Parking fees, if yes cost: as stated by MHS guidelines/complio Interest in neuropsychology, health psychology, cognitive and behavioral science. No specific experience necessary just willingness to learn and demonstrate full commitment.

Description of the Practicum

Neuropsychological evaluations are conducted on an outpatient basis at the Miami VA hospital. We are currently conducting face-to-face evaluations only. The clinic is comprised of a large Spanish-speaking population; therefore, students who are fluent Spanish speakers are preferred (but not required). Common referrals include patients who present with suspected neurodegenerative diseases, movement disorders, epilepsy, TBI, stroke, infectious disease, presurgical evaluations (DBS, epilepsy, organ transplant), neuropsychiatric conditions, and patients with medical comorbidities such as chronic pain and insomnia. Tuesday, and Thursday are required practicum days. Direct clinical contact hours is 4-8 hours per week, depending on clinic duties. Trainees will have the opportunity to conduct 1-2 assessments per week. Trainees are expected to complete 1 report per week, with a 1-2 week turn around time. A minimum of 1 hour weekly supervision will be provided. Participation in didactics is optional. Students will have the opportunity to attend the VA-wide Neuropsychology Didactic Series every Monday from 12-2 pm through Teams videoconference.

Primary Client/Patient Populations Served

- Individuals
- Outpatient
- Adults (19-64)
- Older Adults (65+)

- Unhoused
- LGBTQ+

Primary Treatment Modalities

- Neuropsychology

Primary Assessment Types

- Intelligence
- Neuropsychological
- Objective Personality

Trainee Requirements

- Spanish speaking preferred
- Background Check Level 1
- Fingerprinting
- Medical Marijuana Use prohibited (i.e., not allowed)
- Drug Test
- Proof of Immunization
- Physical Examination

Students who have completed at least 1 prior practicum in Neuropsychology are preferred.

c. Second, Elective

Program/Site Name	Miami VAMC-Primary Care Mental Health Iniegration (PCMHI)
Address	1201 NW 16th Street, Miami, FL 33125
Supervisor Name	Linnette Castillo, Psy.D.
FL License Number	PY7799
Supervisor Email	linnette.castillo@va.gov
Supervisor Phone	305-540-7193

CCE Case Available? No	
Description of the Practicum	
The PCMHI practicum site at the Miami VA is an integrated healthcare service that offers mental health services to primary care patients in a collaborative framework with primary care teams. The mental health professional provides assessment and brief, evidence-based psychosocial treatment of a variety of mental health conditions, which include but are not limited to depression, anxiety disorders, PTSD, alcohol use, tobacco use, non-adherence, decision support, patient education and activation, and assistance with referrals to specialty programs when needed. The mission of PCMHI is to detect and address the broad spectrum of behavioral health needs among primary care patients, with the aims of early identification, quick resolution of identified problems, long-term problem prevention, and healthy lifestyle support.	
Primary Client/Patient Populations Served	
• Individuals • Groups • Outpatient • Adults (19-64) • Older Adults (65+) • Military Active Duty / Veterans	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Mindfulness • Dialectical Behavior Therapy • Other Existential	
Primary Assessment Types	
• Other Subjective measures of emotional functioning	
Trainee Requirements	
• Background Check Level 1 • Background Check Level 2 • Fingerprinting • Drug Test	
Individual supervision is required at least 1 hour per week. Practicum hours are 7:30 to 4pm, onsite Mondays and Tuesdays.	

c. Second, Elective

Program/Site Name	Miami VAMC-Spinal Cord
Address	1201 NW 16th Street, Miami, FL 33125
Supervisor Name	Lindsey Calle-Coule, Psy.D and Pinar Alemdar, Psy.D.

Supervisor Email	Lindsey.Calle-Coule@VA.GOV and Pinar. Alemdar@VA.GOV
Supervisor Phone	305-575-7000 ext. 16871

CCE Case Available? No	
Description of the Practicum	
The SCI/D rotation offers psychological services to veterans suffering from spinal cord injuries or disorders, which include patients with traumatic and non-traumatic spinal cord injuries, or with other diseases affecting the central nervous system and physical functioning, such as multiple sclerosis (MS), Amyotrophic Lateral Sclerosis (ALS), Human T-lymphotropic Virus (HTLV-1), Guillain-Barre, etc. The SCI/D unit is comprised of a 36-bed inpatient floor as well as the SCI/D Home Care Division, which treats patients in their home setting. It is the primary care medical service for over 500 veterans with spinal cord injuries/disorders in South Florida. Patient referrals are received from Primary Care and from a wide range of specialty services, such as Neurology, Oncology, and Immunology. In addition to working with a behavioral medical population, interns also work with psychiatric populations, as some of our patients also struggle with mental health disorders such as schizophrenia or bipolar disorders, as well as affective and anxiety disorders. The SCI/D rotation provides trainees the opportunity to become a member of an interdisciplinary medical rehabilitation team. This interdisciplinary team is comprised of the following: Attending Physician, Medical Resident, Nurse, Psychologist, Social Worker, Physical Therapist, Occupational Therapist, Recreational Therapist, and Nutritionist. Patients discussed range in age from young adult to geriatric. Trainees will also have the opportunity of working within an inpatient and outpatient setting providing both face to face and telemedicine psychotherapy.	
Primary Client/Patient Populations Served	
• Individuals • Groups • Inpatient • Outpatient • Adults (19-64) • Older Adults (65+) • Couples • Military Active Duty / Veterans • LGBTQ+	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Mindfulness • Psychodynamic Therapy • Other Existential Therapy	
Primary Assessment Types	
• Other brief cognitive screening battery	

Trainee Requirements
• Background Check Level 1 • Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test
Trainees should have foundational clinical training and personal readiness that allow them to work effectively with a medically complex veteran population. Foundational skills necessary include basic psychotherapy skills, experience conducting structured/semi-structured clinical interviews, ability to write clear, concise clinical notes, and have had exposure to at least one evidence based therapy model. Trainees should also have experience with time management and organizational skills, especially for adapting to the pace of inpatient care. Personal readiness to work within a fast paced environment and desire to become involved with an interdisciplinary team of medical professionals is an asset to this rotation.

c. Second, Elective

Program/Site Name	Miami-Dade County Community Services Department
Address	701 NW 1st Court, 9th Floor, Miami, FL 33136

Description of the Practicum

The Social Emotional WELLNESS program provides mental health services to patients referred by their pediatricians. We currently work with 4 pediatric practices located throughout the community. This is a brief intervention program that provides 4-6 therapy sessions to children referred by their primary care providers. We work closely with pediatricians and provide them support regarding questions they have about their patients. Students serve as the primary clinician working with the referred patients and will carry a caseload of about 6 weekly cases. Students will receive one hour of individual supervision weekly and can attend didactics provided by the department. Preferred days would be 2-3 days each week with afternoon hours. All services are provided in our clinic. At least one day should land on a Tuesday or Wednesday.

Primary Client/Patient Populations Served

- Individuals
- Outpatient
- Children (under 13)
- Adolescents (13-18)

Description of the Practicum Practicum students are expected to complete 20 hours a week, Monday- Friday, between the hours of 7:00 am and 5:00 pm. There is some flexibility as to student schedules and the 20 hours required per week. The student will have face to face contact with patients to conduct mental status examinations, competency assessments, psychological testing, individual and group interventions, as well as documentation and report writing. The student will have at least one hour of individual supervision a week. Additionally, we have group supervision with practicum students, interns, and residents on a weekly basis. Additionally, when case conferences occur, students are welcomed to attend. We have weekly didactic seminars, which the student is welcome to attend. Due to the forensic nature of our site, practicum students could be subpoenaed by the courts to testify on reports submitted to the courts. Our Hospital attorneys will be available for consultation if this were to occur.

Description of the Practicum The University of Miami, CRB Neuropsychology Outpatient Clinic mostly accepts internal referrals from various medical specialties at Leonard M. Miller School of Medicine. However, community referrals are also accepted on a case by case basis. We provide psychoeducational testing to children and adolescents ages 6-18 and psychological and neuropsychological assessment to adults ages 19-99. The program aims to advance the neuropsychological assessment skills of graduate students by introducing them to advanced testing administration, scoring, and interpretation under the supervision of an experienced licensed neuropsychologist. Basic report writing and consultation skills and conceptualization of cases are an essential aspect of the program, as well as data integration in professional reports. Group and individual supervision along with neuropsychology fellows and visiting psychiatry residents offer externs the ability to interact and work closely with other training professionals in the field, as well as participating in didactic seminars offered by the Division of Neuropsychology.
Primary Client/Patient Populations Served • Other 6-99 (Lifespan Clinic); however, the primary service is for adults (19-64)
Primary Treatment Modalities • Neuropsychology
Primary Assessment Types • Achievement and Aptitude • Intelligence • Neuropsychological • Objective Personality • Projective Personality • Other Computer-based attention and memory testing.
Trainee Requirements • Spanish speaking preferred • Background Check Level 2 • Fingerprinting • Drug Test • Proof of Immunization • Proof of Health Insurance • Physical Examination • Physician's Statement of Readiness • Parking fees, if yes cost: \$6 • Other: Interview, TB Screening

Externs will receive extensive training in the administration, interpretation, and report writing of patients presenting with a variety of neuropsychiatric conditions. Externs will also be required to attend required neuroscience didactic series offered by the Division of Neuropsychology. Externs will receive weekly group and individual supervision on cases assigned to them. Externs will assess individuals with suspected neurodevelopmental, psychiatric, and neurologic conditions on a weekly basis under the direct supervision of a licensed psychologist. Externs will be expected to attend at least 6-8 brain cuttings as part of their neuropathology training at the JMH morgue, sponsored by the UM Department of Pathology.

CCE Case Available? Yes
Description of the Practicum The goal of the Psycho-oncology, End-of-Life, and Bereavement Practicum at Sylvester Comprehensive Cancer Center is to provide trainees with the opportunity to gain supervised clinical experience with adult patients with a history of cancer, caregivers of patients with serious or acute illness, and bereaved family members, including parents bereaved by cancer or suicide. Training will be conducted through ongoing clinical trials, with opportunities for conducting assessments and delivering interventions, most of which are virtual. Individual and group-based interventions utilize supportive, cognitive-behavioral, acceptance-based, and meaning-centered therapeutic approaches to assist research participants in coping with symptom burden, grief; traumatic stress; anxiety; depressed mood; and/or general adjustment to illness, cancer survivorship, caregiving, and/or losses. Experience working with highly distressed populations and Spanish-speaking is a plus. Practicum students will receive comprehensive training in specific interventions and then spend approximately 4-8 hours per week in face-to-face clinical work, 1-2 hours/week in supervision, 1-2 hours of preparation and documentation, and 1-2 hours in meetings, talks, or other learning opportunities. The number of hours fluctuates on a weekly basis depending on the pace of study recruitment. We aim to accommodate participants' scheduling needs, and therefore availability in the evenings is required. The ability to accommodate individuals who request weekend sessions is appreciated.
Primary Client/Patient Populations Served • Individuals • Adults (19-64) • Older Adults (65+)
Primary Treatment Modalities • Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Mindfulness • Other
Primary Assessment Types • Other: Diagnostic Interview
Trainee Requirements • Spanish speaking preferred • Background Check Level 2 Second year practicum students are required to complete and document on average 15 weekly hours of which a minimum would be on average six (6) face to face hours in direct service provision delivery (e.g. assessment or intervention). Elective practicum students are required to document on average 10 weekly hours of which a minimum would be on average 4 face-to-face hours in direct service provision (e.g.

assessment or intervention). Elective practicum placements are typically for two semesters or eight (8) months.

CCE Case Available? No
Description of the Practicum West Gables Rehabilitation Hospital is a 90-bed inpatient medical rehabilitation hospital. The Neuropsychology/Rehabilitation service runs an active consultation-liaison service that receives consults primarily from the Acquired Brain Injury program. At this institute, practicum students will be part of an Interdisciplinary/ transdisciplinary team consisting of Psychiatrists, Neurologists, Physical Therapy, Occupational Therapy, Speech and Language Pathology, Recreational Therapy and Case Management. Programs consist of: • Brain Injury Rehabilitation • Stroke Rehabilitation • Neurologic Rehabilitation • Amputee Rehabilitation • Spinal Cord Rehabilitation • Orthopedic Rehabilitation • Other specialized units The Neuropsychology/ Rehabilitation Clinical Rotation at West Gables provides advanced, hands-on training in medical and rehabilitation neuropsychology within an interdisciplinary inpatient setting. Students primarily provide consultation and liaison (C&L) services, conducting brief cognitive and emotional assessments to support patient care and treatment planning. Under direct supervision, trainees gain experience in clinical interviewing, test selection, scoring, interpretation, and synthesis of results, as well as in developing targeted recommendations and communicating findings to patients, families, and interdisciplinary teams. A significant portion of the rotation emphasizes rehabilitation-based intervention, including opportunities for individual and co-therapy sessions with inpatients addressing adjustment, coping, and behavioral management. Students participate in weekly multidisciplinary rounds, collaborating with Psychiatry, Nursing, Occupational and Physical Therapy, Speech-Language Pathology, Case Management, and Neuropsychology to integrate psychological and medical perspectives in patient care. Students may also attend bimonthly interdisciplinary didactics focusing on brain-behavior relationships, rehabilitation techniques, and neuropsychological case formulation. The rotation offers a high level of clinical exposure, preparing students for advanced training in neuropsychology, health psychology, or integrated rehabilitation practice.
Primary Client/Patient Populations Served • Individuals • Inpatient • Adults (19-64) • Older Adults (65+) • Family
Primary Treatment Modalities • Behavioral/Cognitive Behavioral Therapy • Mindfulness • Neuropsychology
Primary Assessment Types • Neuropsychological
Trainee Requirements

- Spanish speaking preferred
- Medical Marijuana Use prohibited (i.e., not allowed)
- Uniform, Scrubs

Applicants should be enrolled in good academic and clinical standing. Students are expected to have completed at least one year of graduate-level clinical training, including supervised experience in interviewing, mental status examinations, and basic case conceptualization. Preferred coursework includes:

- o Neuropsychological Assessment
- o Cognitive and Affective Bases of Behavior
- o Psychopathology
- o Psychological Assessment (including cognitive and personality assessment)
- o Biological Bases of Behavior / Neuroanatomy
- o Intervention / Psychotherapy coursework

Specific prior clinical experience is preferred but not required, including:

- o Experience administering, scoring, and interpreting cognitive or psychological tests
- o Exposure to medical, rehabilitation, or health psychology settings (e.g., hospitals, clinics, integrated care)
- o Familiarity with brief cognitive screening measures (MoCA, MMSE, RBANS)
- o Experience writing integrated psychological reports or progress notes
- o Comfort working with individuals with neurological disorders or complex medical/psychiatric conditions

Professional competencies expected at entry include:

- o Foundational knowledge of brain–behavior relationships
- o Ability to conduct clinical interviews with professionalism and cultural sensitivity
- o Basic case formulation skills and awareness of scope of practice
- o Ability to accept feedback, incorporate supervision, and work collaboratively on an interdisciplinary team
- o Strong organizational skills, reliability, and professionalism in high-paced medical environments

These prerequisites ensure that trainees begin the rotation prepared for advanced skill development in neuropsychological assessment, inpatient consultation, and rehabilitation-focused intervention.

d. Elective only

Program/Site Name	Cleveland Clinic Florida
Address	2950 Cleveland Clinic Blvd
Supervisor Name	Mark Todd, Ph.D.
FL License Number	PY5359
Supervisor Email	toddm@ccf.org
Supervisor Phone	9546595670

CCE Case Available? No	
Description of the Practicum	
We will have 3 externs working with two different neuropsychologists (Dr. Mark Todd and Dr. Carolina Maldonado). Training will focus on neuropsychology assessment of a broad variety of neurological conditions but especially memory assessment, pre-DBS, and pre-epilepsy surgery patients. Students will be here two days a week and will work with both neuropsychologists depending on the days that they are here.	
Primary Client/Patient Populations Served	
• Adults (19-64) • Older Adults (65+)	
Primary Treatment Modalities	
• Neuropsychology	
Primary Assessment Types	
• Neuropsychological	
Trainee Requirements	
• Spanish speaking preferred • Medical Marijuana Use prohibited (i.e., not allowed)	
Students should be able to conduct basic neuropsychological tests; this is not the ideal placement for someone wanting to learn how to do neuropsychological examinations for the first time.	

d. Elective only

Program/Site Name	Federal Detention Center - Miami (FDC-Miami)
Address	33 NE 4th Street, Miami, FL 33132
Supervisor Name	Carmen Rodriguez, Psy.D.
FL License Number	PY9664
Supervisor Email	c13rodriguez@bop.gov
Supervisor Phone	305-982-1469

CCE Case Available? No	
Description of the Practicum	
Students will have the opportunity to conduct a variety of forensic assessments.* Further, clinical duties include conducting intake screenings, facilitating groups, provision of short- and long-term therapy and crisis intervention. *The forensic program at FDC-Miami is currently unstaffed. Although we anticipate to have a forensic psychologist by the start of the next training year, there's a possibility the program will remain unstaffed. This would mean that students will be exposed to the clinical and correctional aspects of the training program, but not to forensic assessments.	
Primary Client/Patient Populations Served	
• Individuals • Groups • Adults (19-64) • Older Adults (65+) • Military Active Duty / Veterans • Unhoused • LGBTQ+ • Other: Correctional Population	
Primary Treatment Modalities	
• Behavioral/Cognitive Behavioral Therapy • Acceptance and Commitment Therapy • Interpersonal Therapy • Harm Reduction • Mindfulness • Dialectical Behavior Therapy	
Primary Assessment Types	
• Achievement and Aptitude • Intelligence • Neuropsychological • Objective Personality • Other: Forensic Assessment Instruments	
Trainee Requirements	
• Spanish speaking preferred • Background Check Level 3 and up • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Drug Test • Other: TB Screening	

Completion of assessment coursework. Previous psychological assessment and/or intervention experience. Master's degree required.

d. Elective only

CCE Case Available? Yes

Description of the Practicum

Consultation Liaison and Outpatient Services Practicum Pediatric Health Track, Department of Psychology Nicklaus Children's Hospital Location: Nicklaus Children's Hospital, 3100 SW 62nd Avenue, Miami FL, 33155 and 6262 Sunset Drive Suite 500, Miami FL, 33143 Training Director and Supervisor: Rose Alvarez-Salvat, Ph.D, ABPP, rose.alvarez-salvat@nicklaushealth.org, 786-624-3295 Commitment: 15 hours to 20 hours a week, 3 days a week Requirements: This is an advanced practicum placement. Students are required to be advanced in their training career with necessary coursework in child psychopathology, development, assessment, and treatment. The student must also have experience, prior knowledge, and a theoretical base in individual psychotherapy with child clinical populations (some coursework and/or experience with pediatric populations with chronic health conditions is also helpful). Preferred but not required are interested students who have experience working in a hospital setting, preferably with children and adolescents with chronic medical conditions. The practicum requires a background check and an admission interview. A one-week orientation to the Nicklaus Children's Hospital Department of Psychology is required before the practicum start date. Starting the second Monday in July, all students are required to attend Topic Specific seminars from 12-1 for the entirety of the practicum year. Group consultation supervision from 11-12 is also offered and encouraged for students to attend before their start date, but is not mandatory until they start in August. Sensitivity to cultural and individual diversity is emphasized. Students are provided with the opportunity to work with individuals from a variety of cultural and socio-economic backgrounds. ALL pediatric health supervisors are licensed psychologists, bilingual in English and Spanish, and offer supervision and training opportunities in Spanish (when appropriate).

Practicum Description: The program is designed to provide a wide range of clinical experiences with children, adolescents, and families. The student will be responsible for providing behavioral consultation on the medical floors to children, adolescents, and their families. **Consultation Liaison:** As part of the Consultation Liaison service, Practicum Students serve as consultants to physicians, medical residents, child life specialists, nutritionists and nursing personnel involving patients experiencing behavioral and emotional problems associated with a medical condition. They learn rapid assessment and differential diagnosis of psychological factors affecting a wide variety of medical conditions. The focus is on children and adolescents who have acute or chronic medical problems and prevention of complications due to medical conditions in children and adolescents. Services are provided to patients on the following inpatient/outpatient units: Neurology, Diabetes/Endocrinology, Pediatric Intensive Care, and Gastroenterology, among others. The training experience focuses on the behavioral aspects of chronic illness (e.g., diabetes, asthma, Crohn's disease, etc.), adherence with treatment regimens and problems with disease management (e.g., stress management during medical procedures), and supportive interventions for children and adolescents with chronic diseases. Cases range from pain management to complex family dysfunction and provide training experiences in behavioral interventions and prevention of psychological adjustment problems. Training is provided in consultation, assessment, and treatment before, during and after medical interventions. Practicum Students participate as members of multi-disciplinary teams providing comprehensive health care. Multidisciplinary teams consist of physicians,

nurses, social workers, child life specialists, speech/language pathologists, occupational and physical therapists, and patient advocates. Practicum Students typically complete 2-3 consults per day. In addition to the Consultation Liaison rotation patients, students are required to do outpatient therapy follow-ups with 3-4 patients a week, as needed. Supervision: Practicum Students can receive 1 hour of individual supervision each week* (see below) and 1 hour of clinical group supervision. Students will also participate in weekly topic specific seminars. Supplemental rotations: (needs approval by supervisor): In addition to the Consultation Liaison rotation, add-on practicum opportunities are available for: Outpatient Therapy (5-7 hours per week): Outpatient therapy is provided to children and adolescents with a wide range of academic, behavioral, and developmental concerns on individual basis. Practicum Students receive training in individual, family and group modalities and will be able to apply psychotherapeutic techniques. They acquire experience with children, adolescents and family members utilizing both long term and short-term modalities. They will be able to develop and implement therapeutic interventions for children experiencing emotional concerns, behavioral disruption and family systems dysfunction. They will also develop and implement interventions for behavioral/emotional problems associated with chronic and acute medical conditions. Children and adolescents who are presenting with or are at risk for emotional and behavioral problems are seen. Children from preschool age through adolescence and their families are seen in consultation. Emphasis is on the assessment and treatment of common behavior problems including attention deficit hyperactivity disorders, mood and anxiety disorders, oppositional defiant and conduct disorders, eating and elimination disorders, trauma and developmental spectrum disorders. Cognitive-behavioral, developmental, and family systems perspectives are emphasized in understanding psychopathology and developing intervention strategies. Practicum Students typically have 4 to 5 therapy cases per week. • Individual Therapy -Presenting problems include anxiety, depression, aggressive behavior, autism, ADHD, as well as psychosocial factors related to medical conditions. • Groups- Practicum Students can participate as leaders for a variety of clinical groups, such as groups for Social Skills, Anxiety, and ADHD (as available year to year). Pediatric Health Clinics (6-8 hours per week): The Practicum Students will participate in a variety of multidisciplinary clinics and teams addressing medical conditions, such as diabetes, migraines, GI disorders, and neurodevelopmental disorders. The format on this track is a developmental process that involves observation of evaluations/interventions under direct supervision and subsequently completing the evaluations/interventions without direct supervision. Training in psychoeducational and developmental assessment is provided in the areas of clinical interview, assessment, and direct observation of the supervisor working with patients and their families. Clinics available: IBD Clinic (second Thursday of the month) Neuro-Genetics Clinic (second/ third/ fourth Wednesday of the month) Peds Health Clinic (Diabetes, Headache, GI- in South Miami office second Tuesday of the month) Diabetes Clinic (first Thursday and third Tuesday of the month)

A one-week orientation to NCH and Department of Psychology is provided in the summer (usually July or August). Hospital training requirements must be met prior to the start of practicum. Starting the second

Monday of July, students are required to attend Topic Specific Seminar weekly from 12 -1 pm. (available online). During the practicum, student is required to attend Eating Disorder Multidisciplinary meetings on Wednesdays at 2 pm (available online). Supervision will be held 1-2 times a week. Students will complete consults and therapy on the medical floor, as well as, hold an outpatient caseload. Students are expected to come in person to see patients, even when therapy sessions are telehealth. Outpatient therapy hours may end at 6 pm. 10-12 direct clinical contact hours weekly.

d. Elective only

Program/Site Name	Nicole Graham, Ph.D., P.A. Forensic Private Practice
Address	12 SE 7th Street, Suite 705
Supervisor Name	Nicole Graham, Ph.D.
FL License Number	PY 10889
Supervisor Email	drnicolegraham@gmail.com
Supervisor Phone	954-365-5366

CCE Case Available? No
Description of the Practicum This practicum site provides fourth-year doctoral students with advanced training in forensic evaluation within a private practice setting. Dr. Nicole Graham, a forensic psychologist and neuropsychologist, specializes in evaluations across criminal, probate, civil, administrative, and third-party referral contexts—including specialized neuropsychological evaluations for pilots and Air Traffic Controllers (ATCs) requiring FAA medical certification. Students will develop competencies in forensic interviewing, psychological and neuropsychological assessment, diagnostic formulation, court preparation, and report writing. No intervention hours are offered, aside from occasional assessment-feedback sessions. Students will typically participate in 2–4 evaluations per week, engaging in clinical interviews, psychological and neuropsychological testing, collateral interviews, and comprehensive record review. They will also assist with preparation for litigation, including reviewing opposing experts’ reports, helping draft examination outlines, and observing Dr. Graham’s trial strategy meetings, pretrial conferences, and courtroom testimony when appropriate. Students will have opportunities to observe court proceedings and gain exposure to the operational and business aspects of a forensic private practice. Evaluations primarily involve adults, with occasional adolescent cases, presenting with a wide range of psychiatric, cognitive, and personality disorders. Caseloads include criminal forensic evaluations (e.g., competency, insanity, mitigation), civil and probate matters, FAA neuropsychological evaluations for medical recertification, and complex cases requiring multidisciplinary considerations. Students will work with culturally diverse populations, including individuals who require interpreters (e.g., Spanish, Creole, and other languages). These evaluations take place in Dr. Graham’s Fort Lauderdale office and in correctional, medical, and treatment facilities across Broward and Palm Beach Counties, with occasional work in Miami-Dade County. Many environments—such as jails, forensic hospitals, and acute care centers—can be loud, cold, hot, crowded, or malodorous, and may involve intrusive security procedures. Students must maintain professionalism, adapt easily, and work objectively with individuals who may present with complex histories, high-risk backgrounds, or challenging behaviors. This practicum requires maturity, discretion, flexible problem-solving, and the ability to think critically within a high-stakes forensic context.
Primary Client/Patient Populations Served • Individuals • Adolescents (13-18) • Adults (19-64) • Older Adults (65+) • Other: Forensic
Primary Treatment Modalities
Primary Assessment Types • Achievement and Aptitude • Intelligence

• Neuropsychological • Objective Personality
Trainee Requirements
• Background Check Level 2 • Fingerprinting • Medical Marijuana Use prohibited (i.e., not allowed) • Parking fees, if yes cost: Reimbursable with receipt • Other: Driving long distances to Palm Beach / Miami Dade Counties
Fourth year and above doctoral candidate. Must have completed Intro to Forensic Psychology (PSY 4449), Forensic Psychology: Criminal Law (PSY 4418), and Forensic Assessment (PSY 4560). Must have prior assessment experience including supervised administration of the WAIS-IV/V; and a personality assessment (i.e., PAI; MMPI). This is a writing heavy practicum; if you do not enjoy report writing, this would not be a compatible placement.

d. Elective only

Description of the Practicum The Youth Services Department is funded by Palm Beach County to provide FREE short-term, trauma-informed therapy services for youth up to age 22. The practicum is 20 hours a week at the Education & Training Center (Ed Center), which provides family therapy, Parent-Child Interaction Therapy (PCIT; ages 2-78), individual therapy (ages 18-22 only), and parent education, and psychological evaluations. The practicum student is also required to complete at least two psychological evaluations along with completing intake assessments, risk assessments, consultation, and case management. The Ed Center also provides community presentations on mental health topics related to youth and families, such as building attachment, youth and healthy social media practices, and managing anxiety. The practicum student is required to complete a one- hour community presentation on a topic of their choice that is approved by their supervisor. The office is open Monday to Thursday 8:30am to 7:00pm. Practicum trainees are expected to be on site 20 hours a week (2 full days). During that time, they are required to attend didactic trainings every Wednesday from 9:30am to 11:30am and group supervision every Tuesday from 1pm to 3pm. Practicum trainees receive one hour of individual supervision by a licensed psychologist and one hour of individual supervision from a postdoctoral fellow. In addition, the practicum trainee should be available for two evenings each week in order to schedule therapy sessions with clients. At least one morning each week should be available for administering psychological evaluations. A required four-day orientation will take place from August 3rd to 6th from 8:30am to 4:30pm. During the first month of placement, trainees are also required to participate in a two-day introductory training on the Sanctuary Model of Trauma Informed Care.
Primary Client/Patient Populations Served • Individuals • Outpatient • Children (under 13) • Adolescents (13-18) • Adults (19-64) • Family • Other Individual therapy only for young adults (18-22); Adults only seen in the context of family therapy with youth or in parent education
